world class fighting organization capable of engaging one of the world s best armies At the same time it needed to adapt to modern weapons and technologies Dr Leo Hirrel has prepared a comprehensive study of the emergence of Army sustainment as a key part of transforming itself into a modern fighting force It is a story of how the Army began with only the vaguest notions of how to support a multi million Soldier Army and with even less concept of how to operate overseas Yet by the end of the war the Army developed sustainment solutions that would last through the next war and beyond Of course there were numerous mistakes and miscalculations but the achievements were truly remarkable This is a story for all students of military history Understanding the role and development of sustainment functions in the American Expeditionary Forces is critical to appreciating the Army in World War I This book provides a breadth of education for military leaders regardless of their branch
