important as this helps evaluate the strength of business in the chosen environment Also understanding the legal social economic and political status of the chosen environment is very important as the behavioral patterns of these can easily be positive or negative to business Evaluating how the organization will benefit by investing internationally and how they can improve the market locally and globally These facts are necessary as they help create opportunities for organizations and improve efficiency of service in the products and services There are many benefits and limitations that come with internationalizing businesses and managing it For example there are issues of culture and customer behavior which may differ from the known culture by the organization This could make it difficult to operate as culture and behavior need to be studied first before investment Resource allocation can be done by the government who in most cases do this to control the economy Although it is important that the government helps in the control of the resource allocation and manage economic policies with recognition of how delicate the financials are from an international point of view
