Distance Formula

$$d = \sqrt{x_0^2 + y_0^2 + z_0^2}$$

Direction of Cosines

$$\cos \alpha = \frac{x_0}{d} \quad \cos \beta = \frac{y_0}{d}$$

$$\cos \gamma = \frac{z_0}{d}$$

Distance from a point $P_1(x_1, y_1, z_1)$ to the Plane $Ax + By + Cz + D = 0$.

$$d = \frac{|Ax_1 + By_1 + Cz_1 + D|}{\sqrt{A^2 + B^2 + C^2}}$$

Angle between two planes

$$A_1x + B_1y + C_1z + D = 0$$

$$A_2x + B_2y + C_2z + D = 0$$

$$\cos \theta = \frac{|A_1A_2 + B_1B_2 + C_1C_2|}{\sqrt{A_1^2 + B_1^2 + C_1^2} \sqrt{A_2^2 + B_2^2 + C_2^2}}$$

Distance between two planes

$$d = \frac{|D_1 - D_2|}{\sqrt{A^2 + B^2 + C^2}}$$

Gen. Equation of a Plane

$$Ax + By + Cz + D = 0$$

Intercept Form (for sketching)

$$\frac{x}{a} + \frac{y}{b} + \frac{z}{c} = 1$$

$$a = \frac{-D}{A} \quad b = \frac{-D}{B} \quad c = \frac{-D}{C}$$

For Two Planes

$$\frac{A_1}{A_2} = \frac{B_1}{B_2} = \frac{C_1}{C_2} \quad \text{PARALLEL}$$

$$A_1A_2 + B_1B_2 + C_1C_2 = 0 \quad \text{PERPENDICULAR}$$

Standard Equation of a Sphere

$$(x-h)^2 + (y-k)^2 + (z-m)^2 = r^2$$

c(h,k,m)

For an Ellipsoid

$$\frac{(x-h)^2}{a^2} + \frac{(y-k)^2}{b^2} + \frac{(z-m)^2}{c^2} = 1$$

Ashton, 2015-06-24 Excerpt from *Plane and Solid Analytic Geometry* An Elementary Textbook The present work is intended as a text book for classroom use and not as an exhaustive treatise on the subject This object has been kept constantly in mind in writing the book and every subject has been treated from this point of view A large part of the book was mimeographed and tested by use for several years in the author's classes in Harvard University The author has tried to meet the needs of a class which occupies from sixty to seventy recitation hours upon the subject and it is thought that the book ought to be completed by the average class in that time Necessarily some subjects which usually find a place in books on Analytic Geometry have been omitted but it is thought

that nothing has been omitted which has an important bearing on future mathematical study The conies have been treated from their ratio definition and much space and time have been gained by not repeating proofs which are identical or very similar for the three forms of the conic Analytic methods are used throughout the book and the author has attempted to give proofs which are concise and easily understood by the average student but at the same time mathematically rigorous In this connection he would call attention to the proofs in oblique coordinates Arts 12 28 which are usually given without reference to the directions of the lines and therefore do not hold if the positions of the points are changed About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Kindle,1979 **Solid Analytic Geometry** John M. Olmsted,1947-01-01 **Solid Analytic Geometry** Adrian Albert,2007-03 PREFACE THE Author of this very practical treatise on Scotch Loch Fishing desires clearly that it may be of use to all who had it He does not pretend to have written anything new but to have attempted to put what he has to say in as readable a form as possible Everything in the way of the history and habits of fish has been studiously avoided and technicalities have been used as sparingly as possible The writing of this book has afforded him pleasure in his leisure moments and that pleasure would be much increased if he knew that the perusal of it would create any bond of sympathy between himself and the angling community in general This section is interleaved with blank sheets for the readers notes The Author need hardly say that any suggestions addressed to the case of the publishers will meet with consideration in a future edition We do not pretend to write or enlarge upon a new subject Much has been said and written and well said and written too on the art of fishing but

loch fishing has been rather looked upon as a second rate performance and to dispel this idea is one of the objects for which this present treatise has been written Far be it from us to say anything against fishing lawfully practised in any form but many pent up in our large towns will bear us out when we say that on the whole a days loch fishing is the most convenient One great matter is that the loch fisher is depend ent on nothing but enough wind to curl the water and on a large loch it is very seldom that a dead calm prevails all day and can make his arrangements for a day weeks beforehand whereas the stream fisher is dependent for a good take on the state of the water and however pleasant and easy it may be for one living near the banks of a good trout stream or river it is quite another matter to arrange for a days river fishing if one is looking forward to a holiday at a date some weeks ahead Providence may favour the expectant angler with a good day and the water in order but experience has taught most of us that the good days are in the minority and that as is the case with our rapid running streams such as many of our northern streams are the water is either too large or too small unless as previously remarked you live near at hand and can catch it at its best A common belief in regard to loch fishing is that the tyro and the experienced angler have nearly the same chance in fishing the one from the stern and the other from the bow of the same boat Of all the absurd beliefs as to loch fishing this is one of the most absurd Try it Give the tyro either end of the boat he likes give him a cast of ally flies he may fancy or even a cast similar to those which a crack may be using and if he catches one for every three the other has he may consider himself very lucky Of course there are lochs where the fish are not abundant and a beginner may come across as many as an older fisher but we speak of lochs where there are fish to be caught and where each has a fair chance Again it is said that the boatman has as much to do with catching trout in a loch as the angler Well we dont deny that In an untried loch it is necessary to have the guidance of a good boatman but the same argument holds good as to stream fishing
