Advanced Digital Productivity:

The Digitalisation of Science, Technology and Innovation Key Developments and Policies OECD,2020-02-11 This report examines digitalisation's effects on science technology and innovation and the associated consequences for policy In varied and far reaching ways digital technologies are changing how scientists work collaborate and publish **Measuring the Digital Transformation A Roadmap for the Future** OECD,2019-03-11 Measuring the Digital Transformation A Roadmap for the Future provides new insights into the state of the digital transformation by mapping indicators across a range of areas from education and innovation to trade and economic and social outcomes against current digital policy issues as presented in *Going Digital Shaping Policies Improving Lives* **Digital Transformation and Internationalization Strategies in Organizations** Yildiz, Orkun,2021-10-15 Competitive strategies and higher education industry collaboration policies are playing an important role in fostering the reputation and international rankings of higher education institutions The positive impact of these policies may best be observed in economic and social outputs of many countries such as the USA Singapore South Korea EU countries and Turkey However the number of academic publications that specifically concentrate on the impact of these policies on higher education institutions and authorities remains relatively limited *Digital Transformation and Internationalization Strategies in Organizations* covers a wide range of issues and topics including employment systems quality management systems international ranking systems in higher education education and language policies in higher education and business models employed in techno parks This book helps higher education institutions manage their manpower and become cognizant of the factors that may exert a drastic impact on their success It is ideal for managers executives IT consultants researchers practitioners academics professors and undergraduate and postgraduate students

OECD Digital Economy Outlook 2020 OECD,2020-11-27 The OECD Digital Economy Outlook 2020 examines trends and analyses emerging opportunities and challenges in the digital economy This third edition of the OECD Digital Economy Outlook provides a holistic overview of converging trends policy developments and data on both the supply and demand sides of the digital economy It illustrates how the digital transformation is affecting economies and societies Finally it provides a special focus on how the COVID 19 pandemic is amplifying opportunities and challenges from the digital transformation

OECD Economic Surveys: Estonia 2019 OECD,2019-12-17 Estonia's economy continues to perform well and growing incomes support well being However the expansion has peaked and growth is set to soften due to weak international demand Prudent fiscal policy has resulted in low debt but spending pressures related to meeting infrastructure needs and ageing are mounting Old age poverty is high and the proposal to allow early withdrawal of pension funds threatens macroeconomic stability and pension adequacy The gender wage gap is among the highest in the OECD and inequalities in income and health are considerable reflecting gaps in the social safety net The oil shale sector is highly energy intensive and is the main culprit behind Estonia's high greenhouse gas emissions but reducing dependence on the sector is challenging as it is an important

employer and meets 70% of Estonia's energy needs

Enhancing Food Production System Resilience for Food Security Facing a Changing Environment Liming Ye, Ping Zhu, 2023-11-28 As the dominant source of the human food supply the global land system underlies the foundation of the livelihood and wellbeing of humanity on Earth On the one hand the growth rate in the land system's productive capacity of food has played a key role in global food provision Technological breakthroughs in wheat and rice production during the past few decades for instance have greatly contributed to the maintenance of this growth rate in many parts of the world On the other hand however the terrestrial food production system is facing increasing challenges from environmental stressors ranging from climate change air pollution to land degradation Whether and how the global land system will support the food security of more than 10 billion people in the 21st century while minimizing its environmental footprint remains an open question to debate It is inevitable that the global food production system has to be shifted from focusing on production expansion to land system resilience so that the dual goals of sustainable production and environmental friendliness can be simultaneously achieved
