Reshaping Environmental Science Through Machine Learning and IoT Gupta, Rajeev Kumar, Jain, Arti, Wang, John, Pateriya, Rajesh

Kumar, 2024-05-06 In the face of escalating environmental challenges such as climate change air and water pollution and natural disasters traditional approaches to understanding and addressing these issues have yet to be proven sufficient Academic scholars are compelled to seek innovative solutions that marry digital intelligence and natural ecosystems Reshaping Environmental Science Through Machine Learning and IoT serves as a comprehensive exploration into the transformative potential of Machine Learning ML and the Internet of Things IoT to address critical environmental challenges The book establishes a robust foundation in ML and IoT explaining their relevance to environmental science As the narrative unfolds it delves into diverse applications providing theoretical insights alongside practical knowledge From interpreting weather patterns to predicting air and water quality the book navigates through the intricate web of environmental

complexities. Notably, it unveils approaches to disaster management, waste sorting, and climate change monitoring, showcasing the symbiotic relationship between digital intelligence and natural ecosystems. This book is ideal for audiences from students and researchers to data scientists and disaster management professionals with a nuanced understanding of IoT, ML, and Artificial Intelligence (AI).

Innovation in Food Ecosystems Paola De Bernardi, Danny Azucar, 2019-11-28. This book addresses the intersections of entrepreneurship, innovation, and sustainability in food systems and presents high-quality research illustrating the central role that food consumption and production play in achieving sustainability goals. Entrepreneurship and innovation have become particularly relevant aspects in the European Union (EU), especially since the Sustainable Development Goals (SDGs) were announced in 2015. In many cases, innovations tend to arise from small and medium-sized enterprises and from completely new entrepreneurial endeavors. This book represents essential reading for researchers and young academics seeking to reduce disparities and inequalities in food production and consumption patterns. By encouraging sustainable entrepreneurship and innovation, it will also help young scholars find support for their startup ideas.

Urban Narratives: Exploring Identity, Heritage, and Sustainable Development in Cities Mohd Fairuz Shahidan, Gasim Hayder Ahmed Salih, Alessio Cardaci, Israa Hanafi Mahmoud, 2024-03-19. This book engages readers in an enlightening exploration of cities' identities, sustainability, and urban development. Delving into the intricate interplay between art, architecture, and the urban landscape, it offers a compelling analysis of the factors that shape cities and their distinct personalities. The volume uncovers captivating stories of cities as they navigate the delicate balance between heritage conservation and modernity. It highlights innovative strategies employed to preserve historical sites while adapting to the demands of a rapidly changing world. Full of insightful discussions on the impact of cultural lifestyles, the fusion of architectural styles, and the challenges and triumphs of sustainable urban development, it draws upon a diverse range of perspectives and research, inviting architects, urban planners, and scholars to delve into the intricate nuances of cities' identities in the process. With its informative and engaging narrative, this book provides a fresh perspective on cities' identities and offers practical insights into shaping vibrant, livable urban landscapes.

Concepts, Policies and Technology for Sustainable Buildings Thanuja Ramachandra, Roshani Palliyaguru, Gayani Karunasena, 2025-07-12. This book presents knowledge on sustainability concepts, policies, and technologies adopted in both developed and developing countries. The book covers five themes: a) advancing sustainability building rating systems, b) promoting retrofitting buildings and warranting energy-efficient buildings, c) realizing water efficiency within building structures, d) application of the circular economy to manage waste, and e) enhancing the health and well-being of building occupants. The first theme includes case study-based evidence and solutions to different rating systems used in different countries. The second and third themes mainly focus on the achievement of sustainability under the key parameters of energy efficiency and water efficiency through the application of various techniques and technologies such as green roofs, green walls, and grid-tied solar photovoltaic technology with a

special emphasis on retrofitting techniques in different case study contexts The fourth theme primarily addresses the need to clarify misconceptions surrounding the concept of the circular economy within the construction industry It explores its broader applications in various contexts aiming to uncover opportunities for knowledge expansion and transfer across different countries The fifth and final theme of the book addresses various good practices and tools developed to enhance the health and well being of building occupants with a primary focus on how such things help achieve sustainable buildings
