Circular Economy Best:

Industrial Symbiosis for the Circular Economy Roberta Salomone, Andrea Cecchin, Pauline Deutz, Andrea Raggi, Laura Cutaia, 2020-02-07 The book is designed to help public and private decision makers and academics deepen their knowledge and understanding of the contexts obstacles and challenges of a variety of business types involved in Industrial Symbiosis and Circular Economy practices Industrial Symbiosis is reported in the Action Plan on the Circular Economy developed by the European Commission in 2015 COM 2015 0614 final and in its revision of 14 March 2017 but relatively little is known of how these practices start develop or fail and mutate in a rapidly changing context Including selected contributions presented at the 24th ISDRS 2018 Conference Actions for a Sustainable World from theory to practice in the two theme tracks 5c Circular economy zero waste innovation and 5g Industrial symbiosis networking and cooperation as part of industrial ecology this book offers a transdisciplinary perspective on real experiences of industrial symbiosis performed both by industries and the scientific community best practices success and unsuccessful cases implemented or under implementation with the final aim to promote the adoption of Industrial Symbiosis as an operational and systematic tool for the Circular Economy In particular a focus on the environmental social and economic impact of Circular Economy and Industrial Symbiosis practices and how those impacts may be context and or scale dependent is given Waste to Energy in the Age of the Circular Economy Asian Development Bank, 2020-11-01 This handbook features best practices for integrating waste to energy and related technologies into the operations of various industries It discusses current technologies presents a conceptual example of municipal solid waste planning and provides commentary on waste to energy initiatives The importance of appropriate infrastructure as well as flexibility and openness to technologies and business models is emphasized The handbook and its complementary compendium of 18 projects aim to support the efforts of developing countries in Asia and the Pacific to deploy and scale up technologies relevant to the circular economy *Proceedings of the XVII International symposium Symorg 2020* Dušan Starčević, Sanja Marinković, 2020-06-30 Ever since 1989 the Faculty of Organizational Sciences University of Belgrade has been the host of SymOrg an event that promotes scientific disciplines of organizing and managing a business Traditionally the Symposium has been an opportunity for its participants to share and exchange both academic and practical knowledge and experience in a pleasant and creative atmosphere This time however due the challenging situation regarding the COVID 19 pandemic we have decided that all the essential activities planned for the International Symposium SymOrg 2020 should be carried out online between the 7th and the 9th of September 2020 We are very pleased that the topic of SymOrg 2020 Business and Artificial Intelligence attracted researchers from different institutions both in Serbia and abroad Why is artificial intelligence a disruptive technology Simply because it significantly alters the way consumers industries or businesses operate According to the European Commission document titled Artificial Intelligence for Europe 2018 AI is a key disruptive technology that has just begun to reshape the world The Government of

the Republic of Serbia has also recognized the importance of AI for the further development of its economy and society and has prepared an AI Development Strategy for the period between 2020 and 2025 The first step has already been made the Science Fund of the Republic of Serbia after a public call has selected and financed twelve AI projects This year more than 200 scholars and practitioners authored and co authored the 94 scientific and research papers that had been accepted for publication in the Proceedings All the contributions to the Proceedings are classified into the following 11 sections Information Systems and Technologies in the Era of Digital Transformation Smart Business Models and Processes Entrepreneurship Innovation and Sustainable Development Smart Environment for Marketing and Communications Digital Human Resource Management Smart E Business Quality 4 0 and International Standards Application of Artificial Intelligence in Project Management Digital and Lean Operations Management Transformation of Financial Services Methods and Applications of Data Science in Business and Society We are very grateful to our distinguished keynote speakers Prof Moshe Vardi Rice University USA Prof Bla Zupan University of Ljubljana Slovenia Prof Vladan Deved i University of Belgrade Serbia Milica uri Jovi i PhD Director Science Fund of the Republic of Serbia and Harri Ketamo PhD Founder Chairman of HeadAI ltd Finland Also special thanks to Prof Dragan Vukmirovi University of Belgrade Serbia and Prof Zoran evarac University of Belgrade Serbia for organizing workshops in fields of Data Science and Machine Learning and to Prof Rade Mati Belgrade Business and Arts Academy of Applied Studies and Milan Dobrota PhD CEO at Agremo Serbia for their valuable contribution in presenting Serbian experiences in the field of AI The Faculty of Organizational Sciences would to express its gratitude to the Ministry of Education Science and Technological Development and all the individuals who have supported and contributed to the organization of the Symposium We are particularly grateful to the contributors and reviewers who made this issue possible But above all we are especially thankful to the authors and presenters for making the SymOrg 2020 a success

Circular Economy: Global Perspective Sadhan Kumar Ghosh,2019-11-01 A circular economy is an alternative to a traditional linear economy make use dispose in which we keep resources in use for as long as possible extract the maximum value from them whilst in use then recover and regenerate products and materials at the end of each service life Circular economy CE is important towards sustainable development resources circulation and conservation involving closing of material loops and cascading used resources to prevent waste occurrence and transforming the resulting residual streams into new secondary resources Strategies and legislative framework for waste management are important steps for development of a more CE where resource efficiency becomes the key driver for both economic growth and environmental protections A few countries achieved good results implementing CE as a replacement of the linear economy Resource managers and planners should thoroughly identify factors to implement CE for societal benefits This book presents how resource consumption is minimized with rational use based on 3Rs legislative framework and government supports towards implementing CE initiatives example of best practices future plans and targets in different countries those are helpful for

researchers planners and implementers **Recent Advances in Industrial and Systems Engineering** S. G. Ponnambalam, Purushothaman Damodaran, Nachiappan Subramanian, J. Paulo Davim, 2024-08-26 This book presents select proceedings of the International Conference on Recent Advances in Industrial and Systems Engineering RAISE 2023 It covers the latest research in the areas of industrial and systems engineering including manufacturing supply chain digitalization resilience and sustainability Various topics covered in this book are additive manufacturing artificial intelligence modeling and simulation production planning and management digital manufacturing and many more This book is useful for researchers and professionals working in the areas of industrial and production engineering supply chain management quality control and allied fields [Encyclopedia of Sustainable Management](#) Samuel Idowu, René Schmidpeter, Nicholas Capaldi, Liangrong Zu, Mara Del Baldo, Rute Abreu, 2023-11-21 This encyclopedia is the most comprehensive and up to date source of reference for sustainability in business and management It covers both traditional and emerging concepts and terms and is fully international in its scope More than 700 contributions of internationally renowned experts provide a definitive access to the knowledge in the area of sustainable and responsible management All actors in the field will find reliable and up to date definitions and explanations of the key terms and concepts of management in this reference work The Encyclopedia of Sustainable Management represents all aspects of management and business conduct It takes sustainability as a management concept that gives due credit to the complexity and diverging constraints in which businesses and corporations act today and it emphasizes and focuses approaches that help ensure that today s management decisions and actions will be the basis for tomorrow s prosperity **The Sustainability Handbook, Volume 2** Mark Von Rosing, 2025-06-27 The Sustainability Handbook provides a comprehensive and holistic understanding of sustainability bridging the gap between academic theory and business practices Global climate change poses enormous environmental challenges and societies across the world must adapt and innovate to further the goals of sustainability for present and future generations The private sector especially must find new ways of doing business to align their practices with the Sustainable Development Goals SDGs adopted by the international community Using a conceptually structured framework throughout the book examines the latest academic research to summarize what environmental social and economic sustainability actually means in different contexts Using numerous specific case studies and insights from industry leaders the book shows how to strategically integrate sustainability into the organization with extensive focus on policies incentives measures operations production consumption and lifecycle management Volume 2 explores the concept of Radical Sustainability within an enterprise and why it is needed With examples from zero waste to eliminating use of rare earth resources triggering sustainable practices to cause related marketing and sustainability responsibility to external transparency over internal incidents this volume offers practical solutions for those who desire to progress from a Sustainable Strategy to an effective Sustainability Portfolio Management approach Underpinned by international research

based evidence it explores associated trends and drivers within the marketplace and how innovative environmental social economic and governance aspects can be considered and solutions applied For researchers students and businesspeople at all levels and sectors this handbook is an essential reference of the latest sustainability tools and methodologies required to adapt and innovate towards sustainability Provides step by step guidance on key procedures and methodologies Presents chapters that begin with a graphical representation of how the topic fits within the larger framework Includes extensive coverage of sustainability related case studies and lessons learned

Enhancing Sustainable Supply Chain Resilience Through Artificial Intelligence and Machine Learning: Industry 4.0 and Industry 5.0 in Manufacturing Jayesh Rane, Reshma Amol Chaudhari, Nitin Liladhar Rane, 2025-07-26 With the global operating environment becoming rapidly more volatile uncertain complex and ambiguous supply chain resilience has risen to the top of the strategic agenda for organizations that want to not only survive but thrive amid disruptions from economic turmoil and digital transformation and in general rapid change This book aims to provide an intelligible and powerful intelligent adaptive and human centric supply chain as well as manufacturing systems enabled by emerging digital technologies The move from Industry 4.0 to Industry 5.0 represents an important departure from the automation and connectedness of 4.0 to a next level of sustainability resilience and collaboration between people and machines In this context artificial intelligence AI and machine learning ML have become transformational enablers of supply chain resilience providing predictive capabilities autonomous decision making and data driven optimization for intricate manufacturing networks This work offers an exhaustive discussion on how AI and ML can be incorporated to design manage and operate supply chains that are not only more resilient but also better able to predict withstand and recover from the consequences of disruptions Taking the reader step by step through the strategic journey of mining industry and integrative coverage on key topics from risk assessment decision making inventory optimization logistics to anomaly detection and sustainability this work covers a gamut of areas utilising technology applications and outcomes We've tried to offer the best of theory and practice both concepts and building block approaches The individual chapters are based on extensive research while being easily accessible to both practitioners and all those interested in the junction of AI ML and supply chain management smart manufacturing We trust this book will be a useful reference guide for those looking to transform supply chain digitally build a sustainable resilient and the future ready manufacturing ecosystem

Circular Economy: Recent Trends in Global Perspective Sadhan Kumar Ghosh, Sannidhya Kumar Ghosh, 2021-11-23 This book presents the advantages of the circular economy as a powerful and inevitable model for tackling the current challenges against shrinking resources and establishing the resource efficient economy The experienced contributors present the status and strategies of circular economy implementation in several countries with hands on experience to protect the environment while promoting the circular economy through legislative requirements best practices adopted and popularizing the idea of circulation of resources amongst the researchers academia policy makers industry and the general public at large The book

advocates model that consists of designing products and processes with a view to endlessly recycling them evolving a greater scope of sustainable development **The Economics of Sustainable Transformation** Anna Szelągowska, Aneta Pluta-Zaremba, 2021-10-19 This book presents the ways in which three key issues of the modern world transformation digitalisation and sustainability may be combined for the greater good and highlights which activities may be designed to integrate these three directly linked paths It is an experience derived and evidence based analysis of how sustainable development impacts the transformation of the economy and how the business environment influences economic transformation in the light of the sustainable development principles The book addresses the current challenges and shows how the economy can be transformed further in an organic way that meets the needs of society and the environment through the use of digital technologies The multidisciplinary approach to sustainability transformation is one of the core strengths of the book as it emphasises the need for a holistic approach to the functioning of sustainable development ideas at the micro and macro levels The authors present a fresh perspective particularly around the regulations stimulating the sustainable development of enterprises tax systems and the allocation of capital Moreover the book brings together and makes available the results of the latest research on the subject using a vast amount of primary evidence and both quantitative and qualitative methodology The authors insights go beyond the obvious effects of economic transformation and call attention to ways in which smart technology and digitalisation may help to achieve the Sustainable Development Goals The book is directed first and foremost towards academics researchers and students but also professionals who would like to expand their knowledge of sustainable development from a scientific perspective Chapter 1 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license **Circular Economy** Rajni Vohra, Violeta Bulc, 2022 *Extracellular Polysaccharides* Tanmay Sarkar, Dibyajit Lahiri, Moupriya Nag, 2025-09-26 *Extracellular Polysaccharides A Novel Frontier in Alternative Food Strategies* represents a pioneering venture into the understudied territory of extracellular polysaccharides EPS and the potential advancements such as a reduced reliance on chemical additives that they can make in the realm of alternative food solutions This work transcends the conventional discourse on food production challenges by unveiling the multifaceted applications of EPS sourced from diverse organisms like bacteria fungi algae and plants Experts in the field navigate readers through sustainable extraction techniques nutritional insights and cutting edge technologies offering a comprehensive roadmap for revolutionizing the global food industry This book embarks beyond the theoretical delving into practical applications of EPS in various food products from enhancing textures to serving as natural preservatives Addressing current concerns in the food industry this book serves as a catalyst for change providing a holistic perspective on EPS that is both scientifically rigorous and accessible to a wide audience Researchers industry professionals and policymakers will find invaluable insights discovering novel strategies for addressing food security improving nutritional profiles and navigating the

complex landscape of regulatory considerations Extracellular Polysaccharides is a guide to a sustainable and resilient food future empowering its readers to be at the forefront of innovation and positive change *Circular Economy and Waste Valorisation* Jingzheng Ren, Long Zhang, 2022-08-23 The authors and editors of this volume state that with the intensive growth of global industrialization and urbanization the consumption of various resources and materials such as energy minerals and even water is increasing at an amazing speed which poses great pressure on material resources In addition the massive utilization of materials has led to low efficiency resulting in great wastes of resources as well as serious environmental pollutions and degradation which has severely hindered the sustainable development of economy and society In order to transit to sustainable development it is necessary to improved resource efficiency and circular economy and waste valorization are the best alternative ways for achieving this goal This book aims to provide an in depth description of circular economy and waste valorization make assessments for circular economy and waste valorization in different regions and countries and determine the technological pathways and roadmap for achieving circular economy and waste valorization More specifically 1 Conceptions and Theories Concepts and definitions of circular economy and waste valorization and their nexus and contributions to sustainable development 2 Policy and Practice Measurement and assessment of performance or sustainability for implementing circular economy and waste valorization 3 Pathways and Prospects Identification and prioritization of the barriers strategies technologies and pathways for achieving circular economy and waste valorization The book systematically and comprehensively introduces the definitions concepts framework and nexus of circular economy and waste valorization analyzes and measures their performance and sustainability and provides the methods for investigating and prioritizing the barriers and strategies and determining the pathways and roadmap for their development **Circular Economy** Günther Dobrauz-Saldapenna, Nicolas Huras, 2023-11-02 Every leaf that falls from a tree becomes part of a new circle In non human ecosystems everything is re used or re purposed The natural world is the perfect circular system Why is the same not true for humankind Most of the things we possess will ultimately not be used for a long period of time The current take make waste approach is a given fact of our present economy that we have perfected since the industrial revolution The editors Dr Guenther Dobrauz Saldapenna and Nicolas Huras believe that we urgently need to change our ways of producing consuming and living It is time to seriously consider circular economy as an alternative model This book brings together thinkers and innovators from academia as well as business who share their ideas Does it deliver answers to all our challenges Probably not but it is a great place to start The future must be circular and decentralized This book was printed according to the Cradle to Cradle principle The dust jacket contains flower seeds and can be planted in the ground watch the flowers grow **Circular Economy For Dummies** Kyle J. Ritchie, Eric Corey Freed, 2021-04-27 Imagine a waste free future for your business your family and yourself A circular economy is an economic system designed to save money eliminate waste and achieve deep sustainability No brainer right Circular Economy For Dummies explains why the old way of

doing things linear economy is fast going the way of the dinosaurs and it gets you ready to think circular From business processes and material lifecycles to circular design in just about every industry this book is a fascinating glimpse into our sustainable future Whether you re looking to close the resource loop in your business or develop a greener lifestyle for yourself and your family this book shows you how Learn how to innovate for circular economy how to turn trash into treasure and how to calculate the potentially large amount of money this will save you And bonus you ll feel good doing the right thing and being a part of our sustainable future Challenge the assumptions behind the old school linear economy model Learn how we can work together to achieve a waste free future Save money by rethinking your resource use or business supply chain Reimagine households neighborhoods schools companies and societies The future is circular Buck business as usual and learn how to create a circular economy for all

The Degrowth Economy. Strategic Path for Clothing Brands' Future and Empowerment Model for Fashion Consumers?, 2021-08-23 Master s Thesis from the year 2021 in the subject Business economics Offline Marketing and Online Marketing grade 1 AMD Akademie Mode Design GmbH Fresenius University language English abstract This thesis aims to develop degrowth oriented business models for fashion brands that could not only bring competitive advantage to these organizations but also drive the achievement of the Sustainable Development Goals defined by the United Nations in 2015 The outcome of this thesis provides a range of design options and strategies that can be implemented by fashion brands in the degrowth framework combined within a custom buildable business model matrix An empirical research conducted with both qualitative and quantitative data assessed the developed business model matrix based on nine existing fashion organizations The results showed the existence of three observable business model archetypes presenting strong similarities with the proposed model however always limited to a very reductive approach of the degrowth economy The degrowth economy has long been undervalued by businesses considering prosperity without growth as an impossible match With the rising pressures imposed by climate change the new transformative challenges the fashion industry is facing and current shifts in consumers purchasing behaviors the degrowth economy debate appears as a relevant opportunity to initiate systemic change within the fashion industry This research highlights the need and relevance for the development of fashion business models using a more holistic approach of the degrowth economy now given possible thanks to the translation of degrowth concepts and ideas into implementable business strategies It suggests that fashion brands could get strong competitive advantages by following these recommendations and by acting as pioneers in a field that goes beyond the current understanding of sustainability in the fashion industry
