

The Harvard Business School Center for Digital Learning has developed this questionnaire to help you

The 5x questions checklist for an effective hybrid workplace model

01 What do people want?

As mentioned above, a successful hybrid work strategy and hybrid workplace model can only work if it's designed for the people.

Before making any significant decisions or investments, it's important to understand the preferences, needs, and expectations of the employees, IT staff, and the employees who will also need to manage it.

You want to build a model that meets the needs of all stakeholders, not just the employees, and address the most common challenges faced by your team.

How do you think about how you should design a successful hybrid workplace? How do you think about the experience of your employees? How do you think about the experience of your IT staff? How do you think about the experience of your management team?
