Strategic Partners:

The Treachery of Strategies: A call for true EU strategic partnerships (Egmont Papers - 45) Thomas Renard, 2011 *The European Union's Strategic Partnerships* Laura C. Ferreira-Pereira, Michael Smith, 2021-03-04 This book provides a critical and updated analysis of the nature of the EU's strategic partnership diplomacy and of the partnerships themselves in times of power shift and contestation. It links with key aspects of the EU's Global Strategy; it brings together a strong list of experts who work within a clear framework for analysis and it deals not only with the substance of the policy but also with the ways in which the policy as a whole has emerged, is conducted and might develop in the future. In offering an inclusive set of case studies and diverse perspectives, this book aims to advance both conceptualization and analysis of the implementation of the established EU partnerships. The book highlights the notion of strategic partnership as a foreign policy instrument to support EU external action in a context of multilevel change and crisis: its policy dimension as a gradually separated but not separable policy within the Union's external action; the institutional component given the emergence of SPs as a sort of self-preserving institutional platform allowing for denser and deeper cooperation in various policy areas and the implications for the EU's self-conception as an international actor with a global identity and role.

Creating Strategic Partnerships Marilyn J. Amey, Pamela L. Eddy, 2023-07-03 What are the characteristics and conditions that lead to successful educational partnerships? What can we learn from partnerships that fail, cannot be sustained over time, or cease to benefit their partners? This book serves as a guide to the successful implementation of partnerships. It provides the context and tools for readers who are responding to the increasing demands of policy makers, funders, and institutional leaders to use partnerships to address local, state, and federal issues, achieve external mandates, meet public or internal agendas, or pursue international collaborations. This guide provides an evidence-based framework for institutional and organizational leaders to develop the vision, shared values, and norms to achieve the partnership capital that will sustain an enduring relationship. It offers a three-phase model of the development process of collaboration, together with a tool box for those charged with partnering and leading organizational change, and includes a template for both creating new partnerships and sustaining existing ones. The authors start by differentiating between traditional, often ad hoc, partnerships and strategic partnerships that align organizational strategy with partnership actions, and by identifying the importance of moving beyond incremental or surface, first-order change to develop deep, second-order change through which underlying structures and operations are questioned and new processes emerge due to the partnership. They offer analyses and understandings of seven key components for success: exploring motivations, developing partner relationships, communicating and framing purpose, creating collaborative structures and resources, leading various partnership stages, generating partnership capital, and implementing strategies for sustaining partnerships. Each chapter concludes with a case study to provide more understanding of the ideas presented and for use in training or classes. This guide is addressed to policy makers and educational leaders, college administrators, and

their non profit and business partners to enable them to lead and create strategic partnerships and facilitate organizational change Strategic Partners for High Performance Jerome M. United States** Eric T. Jones,Rebecca Jean McLain,James F. Weigand,2002 A quiet revolution is taking place in America s
forests Once seen primarily as stands of timber our woodlands are now prized as a rich source of a wide range of
commodities from wild mushrooms and maple sugar to hundreds of medicinal plants whose uses have only begun to be fully
realized Now as timber harvesting becomes more mechanized and requires less labor the image of the lumberjack is being
replaced by that of the forager This book provides the first comprehensive examination of nontimber forest products NTFPs
in the United States illustrating their diverse importance describing the people who harvest them and outlining the steps that
are being taken to ensure access to them As the first extensive national overview of NTFP policy and management specific to
the United States it brings together research from numerous disciplines and analytical perspectives such as economics
mycology history ecology law entomology forestry geography and anthropology in order to provide a cohesive picture of the
current and potential role of NTFPs The contributors review the state of scientific knowledge of NTFPs by offering a survey
of commercial and noncommercial products an overview of uses and users and discussions of sustainable management issues
associated with ecology cultural traditions forest policy and commerce They examine some of the major social economic and
biological benefits of NTFPs while also addressing the potential negative consequences of NTFP harvesting on forest
ecosystems and on NTFP species populations Within this wealth of information are rich accounts of NTFP use drawn from all
parts of the American landscape from the Pacific Northwest to the Caribbean From honey production to a review of
nontimber forest economies still active in the United States such as the Ojibway harvest of plants recounted here the book
takes in the whole breadth of recent NTFP issues including ecological concerns associated with the expansion of NTFP
markets and NTFP tenure issues on federally managed lands No other volume offers such a comprehensive overview of
NTFPs in North America By examining all aspects of these products it contributes to the development of more sophisticated
policy and management frameworks for not only ensuring their ongoing use but also protecting the future of our forests
