Strategic Supply Chain Alignment:

Strategic Supply Chain Alignment John Gattorna, 2017-03-02 Supply chain performance will be a key indicator of overall corporate success into the next century. This book, edited by logistics and supply chain expert John Gattorna and with international contributions, presents unpublished material on next-generation thinking about the management of the supply chain. Based on the recently developed strategic alignment model, it shows how external market dynamics, the company's strategic response, and internal capability must be aligned if competitive advantage is to be achieved. Supply chain management is a strategic challenge demanding top-level management attention. This book tackles the subject at that strategic level to help companies reposition their supply chains successfully. The book then offers the vital link between strategy setting and implementation, providing comprehensive coverage of the main areas of execution and making it an essential compendium on all aspects of the subject. With case studies from major organizations from around the world, it is a must-read for anyone wishing to be at the forefront of international supply chain management thinking. **Strategic Supply Chain Alignment** brings together for the first time the world's leading logistics professionals, management consultants, and academics to offer their insights and experiences on the latest supply chain management techniques. This collection of previously unpublished material offers the reader a unique opportunity to identify the hot issues, discover emerging strategies, and uncover key industry and market perspectives. Divided into five sections which reflect the important components of the strategic alignment model, the book covers: The market; Customer value creation and segmentation; and the rationale behind the integration of supply with demand; Strategic response; Considers channel strategy; supply chain configuration and operations; and distribution management; Culture; Adopting organization options which focus on delivering

Dynamic Supply Chain Alignment Dr John Gattorna, 2012-09-28 Just like the world financial system but for different reasons, 21st-century corporations need a new business model for their enterprise supply chains. The old conventions no longer work in this new world of volatile and increasingly unpredictable demand and supply. The enterprise needs to become more connected to its own parts as well as its partners up and down the chains it participates in. So too we need to embrace new ways of looking at customers to gain deeper, more insightful impressions of what they are telling us about the way they want to buy our products and services. Finally, these signals need converting into corresponding action driven by the people in the business, leaders and staff alike, who are aligned to their customers' wishes. This is the world of dynamic supply chain alignment where increasingly supply chains are the business. In the follow-up to his hugely successful **Strategic Supply Chain Alignment**, John Gattorna's **Dynamic Supply Chain Alignment** explores how to create and sustain multiple supply chains with a level of flexibility and responsiveness that allow you to respond to opportunities and threats at the same time, aligning with your suppliers, your partners, and your customers. When more executives get to this stage of development, the profits will flow more readily and sustainability of performance will not be the same issue it is today. The way forward is right there in front of

us but says John Gattorna we must throw off old ways and embrace the new Buyer-supplier Strategic Supply Chain Alignment G.
