Strengthening Programs For Writing Across The Curriculum:

Strengthening Programs for Writing Across the Curriculum Susan H. McLeod, 1988 Introducing Writing Across the Curriculum into China Dan Wu, 2012-09-19 Dr Wu Dan's Introducing Writing Across the Curriculum into China is an important and provocative research study that is broadly international in scope. Of particular significance for education in China, this book provides a historical analysis of writing instruction in China and an original application of activity theory used to analyze problems and possibilities for Writing Across the Curriculum (WAC) in higher education. Through an examination of important aspects of WAC as it has developed in the United States, Dr Wu Dan brings together various perspectives in support of developing and sustaining WAC programs in China and by analogy throughout the world. Her work opens new avenues for research in writing and for the teaching of courses throughout the curriculum using a writing in the disciplines approach. A major contribution to international WAC scholarship, Introducing Writing Across the Curriculum into China will be invaluable to English faculty and to all readers interested in educational innovations in China. **Writing Across Distances and Disciplines** Joyce Magnotto Neff, Carl Whithaus, 2009-03-04 Writing Across Distances and Disciplines addresses questions that cross borders between onsite hybrid and distributed learning environments between higher education and the workplace and between distance education and composition pedagogy. This groundbreaking volume raises critical issues, clarifies key terms, reviews history and theory, analyzes current research, reconsiders pedagogy, explores specific applications of WAC and WID in distributed environments, and considers what business and education might teach one another about writing and learning. Exploring the intersection of writing across the curriculum, composition studies, and distance learning, it provides an in-depth look at issues of importance to students, faculty, and administrators regarding the technological future of writing and learning in higher education. *Transformations* Holly Hassel, Kristi Cole, 2021-12-01 As teaching practices adapt to changing technologies, budgetary constraints, new student populations, and changing employment practices, writing programs remain full of people dedicated to helping students improve their writing. This edited volume offers strategies for implementing large and small scale changes in writing programs by focusing on transformations: the institutional, programmatic, curricular, and labor practices that work together to shape our teaching and learning experiences of writing and rhetoric in higher education. The collection includes chapters from multiple award-winning writing programs, including the recipients of the Two Year College Association's Outstanding Programs in English Award and the Conference on College Composition and Communication's Writing Program Certificate of Excellence. These authors offer perspectives that demonstrate the deep work of transformation in writing programs and practices, write large, confirm the ways in which writing programs are connected to and situated within larger institutional and disciplinary contexts, and outline successful methods for navigating these contexts in order to transform the work. In using the prism of transformation as the organizing principle for the collection, *Transformations* offers a range of strategies for adapting writing programs so that they meet the

needs of students and teachers in service of creating equitable ethical literacy instruction in a range of postsecondary contexts Contributors Leah Anderst Cynthia Baer Ruth Benander Mwangi Alex Chege Jaclyn Fiscus Cannaday Joanne Giordano Rachel Hall Buck Sarah Henderson Lee Allison Hutchinson Lynee Lewis Gaillet Jennifer Maloy Neil Meyer Susan Miller Cochran Ruth Osorio Lori Ostergaard Shyam Pandey Cassie Phillips Brenda Refaei Heather Robinson Shelley Rodrigo Julia Romberger Tiffany Rousculp Megan Schoen Paulette Stevenson *Theorizing Composition* Mary Kennedy, 1998-06-25

The last 25 years have witnessed extraordinary growth in the academic specialization variously described as composition studies or rhetoric and composition What was noticeable about the field in its infancy was a preoccupation with practice a lack of emphasis on theory and an exclusive reliance on the writing process As its disciplinary status has grown the field has become far more theoretical Composition studies has expanded its focus reconceptualized the writing process and embraced a wide range of critical perspectives The result of this change is that terms such as poststructuralism social construction gender and genre which were largely unknown in 1965 now dominate discussion This reference book is a guide to the multiplicity of theories that have emerged to form the disciplinary foundation of composition studies The volume consists of 66 entries each of which is written by an expert contributor and focuses on a particular theory or group of theories While the entries show how various individuals have contributed to theoretical movements very few concentrate on the work of a single theorist Each entry first provides a critical summary of a particular theory or group of theories including key elements basic concepts and claims and information about seminal or particularly influential works It then reviews the theory's critical reception in composition studies and discusses its significance in the field The bibliography at the end of each entry lists primary texts and major scholarship related to the theory and provides additional suggestions for further reading The volume closes with a selected bibliography of important works
