Stress Relief Tips for Teachers

30 Second read

Here's a set of practical, teacher-friendly stress relief tips that you can use every day.

1. **Take regular breaks**
Take 5 minutes of downtime every hour. Use this time to stretch, get some fresh air, or just sit quietly. It's important to take these breaks to avoid burnout.
2. **Establish priorities**
To be an effective teacher, you need to know what's most important. Focus on the most important tasks and delegate or say no to the rest.
3. **Establish a routine**
Having a set routine for your workday can help you stay organized and reduce stress. Try to stick to it as much as possible.
4. **Practice self-care**
Make sure you're taking care of yourself. Get enough sleep, eat well, and exercise regularly. These things will help you cope with stress better.
5. **Seek support**
Don't be afraid to ask for help. Talk to your colleagues, a mentor, or a counselor. You don't have to do it all on your own.
6. **Be realistic about your goals**
The goal is to be a good teacher, not a perfect one. Set realistic goals for yourself and your students.
7. **Practice self-compassion**
Remember that you're only human. You can't do everything perfectly, and that's okay. Be kind to yourself when you make mistakes.
8. **Find a hobby**
Engage in a hobby that you enjoy. It can help you relax and recharge. Make time for yourself, even if it's just a few minutes a day.
9. **Practice gratitude**
Take a moment each day to think about the things you're grateful for. It can help you focus on the positive and reduce stress.
10. **Get support**
If you're feeling overwhelmed, talk to your supervisor or a counselor. They can help you find ways to manage your stress.

Stress in Teachers Jack Dunham, Ved Prakash Varma, 1998-08-10 Examines the stress in teaching multidisciplinary concept broad enough to include physiological psychological organisational and legal perspectives The editors see stress in teaching as an interactionist concept a complex and sometimes precarious balance between perceived work pressures coping strategies and stress reactions The early chapters in the book reflect this view and make contributions to understanding the causes and costs of stress in teaching The authors of these chapters come collectively to the conclusion that there is an alarmingly low level of job satisfaction in teaching and that turnover intentions appear to be on the increase This pessimistic view is challenged in later chapters by professionals working in the field of stress management These contributions highlight the danger of focusing stress research and management These contributions highlight the danger of focusing stress research and management strategies on the individual rather than the organization and report the authors hands on knowledge of teacher support teams and workshop and whole school approaches to diminishing the causes and costs of teacher stress and improving training and career development The concluding chapters demonstrate the editors belief that useful insights for workers in the education service can be gained from studies of workplace stress in other occupations
