Sunstorm A Time Odyssey Two:

Sunstorm Arthur C. Clarke, Stephen Baxter, 2006-02-28 Clarke and Baxter have mastered the art of saving the world in blockbuster style Entertainment Weekly Returned to the Earth of 2037 by the mysterious and powerful Firstborn Bisesa Dutt is haunted by memories of her five years spent on the strange alternate Earth called Mir a jigsaw puzzle world made up of lands and people cut out of different eras of Earth's history Why did the Firstborn create Mir Why was Bisesa taken there and then brought back just a day after her disappearance Bisesa's questions are answered when scientists discover an unnatural anomaly in the sun's core evidence of alien intervention more than two thousand years ago Now plans set in motion by inscrutable observers light years away are coming to fruition in a sunstorm designed to eradicate all life on Earth in a bombardment of radiation As the apocalypse looms religious and political differences on Earth threaten to undermine every countereffort And all the while the Firstborn are watching Praise for Sunstorm An absolute must for science fiction fans All Things Considered NPR Enthralling highly satisfying The New York Times Book Review Will keep readers turning pages Publishers Weekly

Science Fiction and the Prediction of the Future Gary Westfahl, Wong Kin Yuen, 2014-01-10 Science fiction has always challenged readers with depictions of the future Can the genre actually provide glimpses of the world of tomorrow This collection of fifteen international and interdisciplinary essays examines the genre's predictions and breaks new ground by considering the prophetic functions of science fiction films as well as SF literature Among the texts and topics examined are classic stories by Murray Leinster C L Moore and Cordwainer Smith 2001 A Space Odyssey and its sequels Japanese anime and Hong Kong cinema and electronic fiction

The Last Theorem Arthur C. Clarke, Frederik Pohl, 2008-08-05 Two of science fiction's most renowned writers join forces for a storytelling sensation The historic collaboration between Frederik Pohl and his fellow founding father of the genre Arthur C Clarke is both a momentous literary event and a fittingly grand farewell from the late great visionary author of 2001 A Space Odyssey The Last Theorem is a story of one man's mathematical obsession and a celebration of the human spirit and the scientific method It is also a gripping intellectual thriller in which humanity facing extermination from all but omnipotent aliens the Grand Galactics must overcome differences of politics and religion and come together or perish In 1637 the French mathematician Pierre de Fermat scrawled a note in the margin of a book about an enigmatic theorem I have discovered a truly marvelous proof of this proposition which this margin is too narrow to contain He also neglected to record his proof elsewhere Thus began a search for the Holy Grail of mathematics a search that didn't end until 1994 when Andrew Wiles published a 150 page proof But the proof was burdensome overlong and utilized mathematical techniques undreamed of in Fermat's time and so it left many critics unsatisfied including young Ranjit Subramanian a Sri Lankan with a special gift for mathematics and a passion for the famous Last Theorem When Ranjit writes a three page proof of the theorem that relies exclusively on knowledge available to Fermat his achievement is hailed as a work of genius bringing him fame and fortune But it also brings him to the attention of

the National Security Agency and a shadowy United Nations outfit called Pax per Fidem or Peace Through Transparency whose secretive workings belie its name Suddenly Ranjit together with his wife Myra de Soyza an expert in artificial intelligence and their burgeoning family finds himself swept up in world shaking events his genius for abstract mathematical thought put to uses that are both concrete and potentially deadly Meanwhile unbeknownst to anyone on Earth an alien fleet is approaching the planet at a significant percentage of the speed of light Their mission to exterminate the dangerous species of primates known as homo sapiens [Arthur C. Clarke](#) Gary Westfahl,2018-06-14 Already renowned for his science fiction and scientific nonfiction Arthur C Clarke became the world s most famous science fiction writer after the success of 2001 A Space Odyssey He then produced novels like Rendezvous with Rama and The Fountains of Paradise that many regard as his finest works Gary Westfahl closely examines Clarke s remarkable career ranging from his forgotten juvenilia to the passages he completed for a final novel The Last Theorem As Westfahl explains Clarke s science fiction offered original perspectives on subjects like new inventions space travel humanity s destiny alien encounters the undersea world and religion While not inclined to mysticism Clarke necessarily employed mystical language to describe the fantastic achievements of advanced aliens and future humans Westfahl also contradicts the common perception that Clarke s characters were bland and underdeveloped arguing that these reticent solitary individuals who avoid conventional relationships represent his most significant prediction of the future as they embody the increasingly common lifestyle of people in the twenty first century

master of science fiction Sir Arthur C Clarke's writing for decades With *Time's Eye* and *Sunstorm* the first two books in their acclaimed *Time Odyssey* series Clarke and his brilliant co author Stephen Baxter imagined a near future in which the Firstborn seek to stop the advance of human civilization by employing a technology indistinguishable from magic Their first act was the *Discontinuity* in which Earth was carved into sections from different eras of history restitched into a patchwork world and renamed Mir Mir's inhabitants included such notables as Alexander the Great Genghis Khan and United Nations peacekeeper Bisesa Dutt For reasons unknown to her Bisesa entered into communication with an alien artifact of inscrutable purpose and godlike power a power that eventually returned her to Earth There she played an instrumental role in humanity's race against time to stop a doomsday event a massive solar storm triggered by the alien Firstborn designed to eradicate all life from the planet That fate was averted at an inconceivable price Now twenty seven years later the Firstborn are back This time they are pulling no punches They have sent a quantum bomb Speeding toward Earth it is a device that human scientists can barely comprehend that cannot be stopped or destroyed and one that will obliterate Earth Bisesa's desperate quest for answers sends her first to Mars and then to Mir which is itself threatened with extinction The end seems inevitable But as shocking new insights emerge into the nature of the Firstborn and their chilling plans for mankind an unexpected ally appears from light years away
