Technological Competitiveness:

Industrial Competitiveness and Technological Advancement Wendy H. Schacht, 2006 There is ongoing interest in the pace of U S technological advancement due to its influence on U S economic growth productivity and international competitiveness Because technology can contribute to economic growth and productivity increases congressional attention has focused on how to augment private sector technological development Legislative activity over the past two decades has created a policy for technology development albeit an ad hoc one Because of the lack of consensus on the scope and direction of national policy Congress has taken an incremental approach aimed at creating new mechanisms to facilitate technological advancement in particular areas and making changes and improvements as necessary Congressional action has mandated specific technology development programs and obligations in federal agencies that did not initially support such efforts Many programs were created based upon what individual committees judged appropriate within the agencies over which they had authorization or appropriation responsibilities The use of line item funding for these activities including the Advanced Technology Program and the Manufacturing Extension Program of the National Institute of Standards and Technology as well as for the Undersecretary for Technology at the Department of Commerce is viewed by proponents as a way to ensure that the government encourages technological advance in the private sector Some legislative activity beginning in the 104th Congress has been directed at eliminating or significantly curtailing many of these federal efforts Although this approach has not been adopted the budgets for several programs have declined Questions have been raised concerning the proper role of the federal government in technology development and the competitiveness of U S industry As the 110th Congress begins to develop its budget priorities how the government encourages technological progress in the private sector again may be explored and or redefined

Competitiveness Through Technology Jerry Dermer, 1986 *Industrial Competitiveness and Technological Advancement: Debate Over Government Policy* Wendy H. Schacht, Resources, Science, and Industry Division, 2005 There is ongoing interest in the pace of U S technological advancement due to its influence on U S economic growth productivity and international competitiveness Because technology can contribute to economic growth and productivity increases congressional attention has focused on how to augment private sector technological development Legislative activity over the past two decades has created a policy for technology development albeit an ad hoc one Because of the lack of consensus on the scope and direction of a national policy Congress has taken an incremental approach aimed at creating new mechanisms to facilitate technological advancement in particular areas and making changes and improvements as necessary Congressional action has mandated specific technology development programs and obligations in federal agencies that did not initially support such efforts Many programs were created based upon what individual committees judged appropriate within the agencies over which they had authorization or appropriation responsibilities The use of line item funding for these activities including the Advanced Technology Program and the Manufacturing Extension Program of

the National Institute of Standards and Technology as well as for the Undersecretary for Technology at the Department of Commerce is viewed by proponents as a way to ensure that the government encourages technological advance in the private sector Some legislative activity beginning in the 104th Congress has been directed at eliminating or significantly curtailing many of these federal efforts Although this approach has not been adopted the budgets for several programs have declined Questions have been raised concerning the proper role of the federal government in technology development and the competitiveness of U S industry

Industrial Competitiveness and Technological Advancement Wendy H. Schacht,2010-11 Technology can contribute to economic growth and productivity increases Legislative activity over the past 25 or more years has created a policy for technology development Because of the lack of consensus on the scope and direction of a national policy Congress has taken an incremental approach aimed at creating new mechanisms to facilitate technological advancement in particular areas and making changes and improvements as necessary Contents of this report 1 Technol and Competitive 2 The Fed Role in Technology Development 3 Legislative Initiatives and Current Programs Increased R Joint Industrial Research Commercializing Federally Funded R Different Approach

Technology, Trade and Growth in OECD Countries Valentina Meliciani,2001-05-10 Presenting new material and a fresh perspective Technology Trade and Growth in OECD Countries provides a unifying framework for the exploration of the role played by specialisation in economic growth and international competitiveness

Product Development Practices and Their Organisational Information Requirements Ari Maunuksela,2003 Information Technology and Industrial Competitiveness Chris F. Kemerer,2012-12-06 Information Technology IT the field that links computer and

communications equipment and software is transforming the way modern business is done. Examples of factors leading these changes are rapidly decreasing costs of computer hardware, government deregulation accelerating global competitiveness, an increasing management awareness and the knowledge of how to employ Information Technology successfully. These have all led to the increase of IT's effects on existing markets and in the process are creating entirely new markets. This book explores a variety of advances in IT by a group of researchers who are at the cutting edge of this research. Moreover, the book examines these innovative developments in terms of the Information Technology field and its effect on modern business. It is becoming increasingly apparent that IT is critical to success in today's competitive marketplace. As a result, this book examines a host of emerging effects at work in these developments and seeks to make sense out of these counter-acting, sometimes multiplicative effects which can become obstacles for managers who wish to develop competitive applications of IT. These effects and the development of IT are grouped into four general categories in the book: Future Markets, Inter-Organizational Systems, Focused Applications, and Future Strategies.

Perspectives on U.S. Competitiveness in Science and Technology Titus Galama, James R. Hosek, 2007. Is the United States in danger of losing its competitive edge in science and technology? In response to this concern, the Under Secretary of Defense for Personnel and Readiness asked RAND to convene a meeting held on November 8, 2006, to review evidence presented by experts from academia, government, and the private sector. The papers presented at the meeting addressed a wide range of issues surrounding the United States' current and future S/T competitiveness, including science policy, the quantitative assessment of S/T capability, globalization, the rise of Asia (particularly China and India), innovation, trade, technology diffusion, the increase in foreign-born S/T students and workers in the United States, new directions in the management and compensation of federal S/T workers, and national security and the defense industry. These papers provide a partial survey of the facts, challenges, and questions posed by the potential erosion of U.S. S/T capability. The importance of S/T to U.S. prosperity and security warrants that policymakers pay careful attention to the various high-level reports issued over the past few years that warn of pressures on the U.S. lead in S/T. The intellectual point of embarkation for the RAND meeting was the foremost recent such report, *Rising Above the Gathering Storm: Energizing and Employing America for a Brighter Economic Future* by the National Academy of Sciences.

The Technological Dimensions of International Competitiveness National Academy of Engineering, Committee on Technology Issues that Impact International Competitiveness, 1988.

URU Catalogue United Nations Conference on Trade and Development, Reference Unit, 1991.

Technology, Culture, and Competitiveness Michael Talalay, Chris Farrands, Roger Tooze, 1997. The contributors look at the causes and consequences of rapid technological change in an increasingly globalized world. They discuss how technology relates to political and economic change, how it affects our culture, and how culture affects technology.

The Technological Competitiveness of Japanese Multinationals Robert D. Pearce, Marina Papanastassiou, 1996. Explores the development of Japanese multinational R/D laboratories.
