Copyright and the Challenge of the New Brad Sherman, Leanne Wiseman, 2012-08-01 Copyright is not as is often thought something that is periodically extended to cover a new field or medium rather copyright redefines itself whenever its efficacy is challenged While many factors have contributed to this process the most consistent has been the challenges created by new technologies The contributing authors build upon this insight to show that copyright law is and has always been a creature of technology Each chapter focuses on a specific technology or group of technologies photography telegraphy the phonogram radio film the photocopier the tape player television and computer programs emphasizing the changes that each technology instigated and the challenges and opportunities it created Perhaps the most profound insight of this extraordinary book is the authors claim ably supported in a series of intriguing chapters that the way the law responds and reacts to new technologies is always mediated by the political social economic and cultural environment in which the interaction occurs For example these chapters describe and explain how statutory schemes of remuneration arose from failures to effectively police new forms of piracy persistent litigation and lobbying by copyright owners forces legislatures and courts to devise new laws content e g sporting events generates new rules of access to broadcasts and fair copying e g by libraries is the necessary exception that proves the rule As well as providing insight into the ways that copyright law interacted with old technologies when they were new the book also offers important insights into problems and issues currently confronting copyright law and policy such as the appropriate scope of copyright and the relation between copyright and the public interest With the broad perspectives opened by these essays academics practitioners and policymakers in the field will find themselves well equipped to deal with the problems that will inevitably be created by technologies in the future

Law and renewable energy Fernando Joaquim Ferreira Maia, 海 (Hai Yan), 海 (Haitian Ma), Ana Paula Basso, 2023-08-01 Discussing the right of Renewable Energies is to ensure the possibility of sustainable development by a path different from that taken by the great central nations Academics from China and Brazil lend themselves through this cooperation to the production of knowledge that serves as a basis for an adequate regulation of the matter taking into account the international law for people's development and the common principles of environmental protection added to the social protection and improvement of institutions plus the control of planned actions regarding the execution and implementation of this new energy matrix Law is a language that makes it possible in addition to resolving possible conflicts to guide and put into practice concrete actions in the sense of expanding possibilities for the good use of renewable energies
