The Environmental Challenge, 1992 *Pandora's Green Box* Paul Clark, 2016-05-01

Pandora's Green Box introduces the subject of population growth considered by the environmental community as one of the greatest environmental challenges facing the planet Growth is seen as a multiplier of nearly all environmental areas Yet *Pandora's Green Box* focuses its attention on whether this issue is one that directly impacts America asking the first of two fundamental questions Is population growth in America a justifiable domestic environmental issue It is from the resolution of this first inquiry that *Pandora's Green Box* leads to its apex second segment and to its contentiousness asking If population growth in America is a justified environmental challenge are political motives responsible for keeping the issue concealed To determine a resolution to this question the book looks into the shifting growth trends from fertility to immigration as the driving factor of growth in America today It then evaluates the politics of both environmental and immigration issues The reader is led to ask the question why has the environmental establishment changed course on this issue Only through a complete and scientific evaluation of these fundamental questions can a probable conclusion be drawn which leads us to resolve the very question posed within the title of this manuscript Have Politics Concealed Americas Greatest Environmental Challenge and Threatened America's Way of Life With strong
