**The Iowa Breeding Bird Atlas II** Stephen J. Dinsmore, Douglas C. Har, Christopher J. Caster, Jacob T. Gilliam, Rex R. Johnson, Schane S. Patterson, Karen E. Kinkead, Ann M. Johnson, Bruce Ehresman, 2020 This Iowa Breeding Bird Atlas II BBA II is intended to provide a comprehensive look at the distribution and breeding evidence for Iowa's breeding birds and document changes since the first atlas effort. These data were gathered during a five year period and so represent a snapshot in time. This publication summarizes atlas findings through individual species accounts that also include basic information on each species status in Iowa along with their habitat, breeding dates, basic nesting information and population changes as measured by the federal Breeding Bird Survey. Ziolkowski et al 2010 U S Geological Survey 2020 Comparisons are also made to recent atlas efforts in surrounding states in an attempt to provide a regional context to Iowa's findings.

**The Iowa Breeding Bird Atlas** Laura Spess Jackson, Carol A. Thompson, James J. Dinsmore, 1996 The Iowa Breeding Bird Atlas the first comprehensive statewide survey of Iowa's breeding birds provides a detailed record of the composition and distribution of the avifauna of the Hawkeye State. The atlas documents the presence of 199 species, 158 of which were confirmed breeding. This landmark volume will alert Iowans to the limited distribution of numerous species and serve as a guide to the management practices such as forest and wetland management, set aside programs, reduction in farm chemical use and crop diversity which could help insure that many future changes are positive ones. The Iowa Breeding Bird Atlas provides a welcome and much needed baseline for future comparisons of changes in Iowa's birdlife and by extension the lives of all animals in the state.

**Iowa Breeding Bird Atlas II** Dinsmore and Ehresman, 2020-12-17 Results of the Iowa Breeding Bird Atlas II conducted 2008-2012. This book summarizes changes from the first atlas project twenty years ago with maps, tables and charts showing the differences.

**The Iowa Nester**, 2009 *Kansas Breeding Bird Atlas* William H. Busby, John L. Zimmerman, 2001 The Kansas Breeding Bird Atlas represents the efforts of 180 volunteers who diligently sought out birds over a period of six years, observing their behavior and locating active nests and fledged young throughout the state, whether in tallgrass prairies, riparian forests or wetlands. In addition to these efforts, Busby and Zimmerman gathered a wealth of information relating the volunteers' observations to ecological factors affecting the birds' habitat selection.

Iowa's Changing Wildlife James J. Dinsmore, Stephen J. Dinsmore, 2023-12-05 This book tells the recent story of Iowa's wildlife from recovery and restoration to disappointing declines. During the

pandemic the number of visitors to state parks wildlife areas and other natural areas has increased greatly For many this is a new experience This book will provide them with a reliable source of information about many of the animals that they are now seeing Much has changed with Iowa s wildlife in the past 30 years Some species like Canada goose wild turkey and white tailed deer that once were rare in Iowa are now common and others like sandhill crane river otter and trumpeter swan are becoming increasingly abundant The goal of this book is to provide an up to date scientifically based summary of changes in the distribution status conservation needs and future prospects of about 60 species of Iowa s birds and mammals whose populations have increased or decreased in the past 30 years Emphasis is given to several species that have experienced significant growth some that show signs that they may experience future growth and a few whose long term future in Iowa is in jeopardy This book is not an update of James and Stephen Dinsmore s earlier book A Country So Full of Game which discussed Iowa s wildlife up to about 1990 This is an entirely new book discussing what has happened in the years 1990 2020 For species covered in the earlier book only a brief discussion of earlier years is provided to connect the new material to what happened earlier

Johnsgard,2018 This book documents nearly 500 US and Canadian locations where wildlife refuges nature preserves and similar properties protect natural sites that lie within the North American Great Plains from Canada s Prairie Provinces to the Texas Mexico border Information on site location size biological diversity and the presence of especially rare or interesting flora and fauna are mentioned as well as driving directions mailing addresses and phone numbers or internet addresses as available US federal sites include 11 national grasslands 13 national parks 16 national monuments and more than 70 national wildlife refuges State properties include nearly 100 state parks and wildlife management areas Also included are about 60 national and provincial parks national wildlife areas and migratory bird sanctuaries in Canada s Prairie Provinces Many public access properties owned by counties towns and private organizations are also described

[The North American Perching and Dabbling Ducks](#) Paul Johnsgard,2017-03 This volume the fourth in a series of books that collectively update and expand P A Johnsgard s 1975 The Waterfowl of North America summarizes research findings on this economically and ecologically important group of waterfowl The volume includes the mostly tropical perching duck tribe Cairinini of which two species the muscovy duck and the wood duck are representatives Both species are adapted for foraging on the water surface mostly on plant materials but typically perch in trees and nest in elevated tree cavities or other elevated recesses This volume also includes the dabbling or surface feeding duck tribe Anatini a large assemblage of duck species that mainly forage on the water surface but nest on the ground or only very rarely in elevated locations Of this tribe 12 species that regularly breed in North America are included among them such familiar species as mallards wigeons pintails and teal Descriptive accounts of the distributions populations ecologies social sexual behaviors and

breeding biology of all these species are provided together with distribution maps Five additional Eurasian and West Indian species have been reported several times in North America these have been included with more abbreviated accounts but all 17 species are illustrated by drawings photographs or both The text includes about 84 000 words and contains more than 1 000 references There are also 12 distribution maps 21 drawings 28 photographic plates and 58 anatomical or behavioral sketches

*Birds in Iowa* Thomas Hugh Kent,1996

**The North American Whistling-Ducks, Pochards, and Stiff-tails** Paul Johnsgard,2017-03-24 Although the 12 species representing three waterfowl tribes described in this volume are not closely related they fortuitously provide an instructive example of adaptive evolutionary radiation within the much larger waterfowl lineage the family Anatidae especially as to their divergent morphologies life histories and social behaviors The whistling ducks *Dendrocygna* with three known North American species are notable for their permanent pair bonds extended biparental family care and strong social cohesion In contrast males of the five typical pochards of North American diving ducks *Aythya* establish monogamous pair bonds that are maintained only long enough to assure that the female's eggs are fertilized The endpoint of this behavioral gradient promiscuity or polygyny exists among at least some of the typical stiff-tails *Oxyura* Such diverse reproductive strategies have exerted powerful evolutionary influences on interspecies variations in sexual dimorphism sexual behavior anatomy ecology and other traits This volume includes more than 63 000 words plus some 200 maps photos drawings and sketches and nearly 650 literature citations It is the last of five volumes that describe all 55 waterfowl species that have been historically documented in North America collectively the volumes total over 300 000 words with nearly 3 000 literature citations and more than 600 maps photos drawings and sketches
