This book provides a discussion of advances in our understanding of the juvenile offender. These derive from psychological and criminological theory and research on the phenomenon of youth crime and from efforts on the part of social science researchers and practitioners to develop and evaluate new approaches to prevention and treatment. The theoretical and empirical advances relate first to analyses of the nature and extent of youth crime. This is reflected for example in various descriptive and classification systems developed for characterizing juvenile offenders. Significant advances are also being made in understanding the risk factors associated with youthful criminal activity as well as the processes linking the risk factors with antisocial behaviors. This understanding is based on theory and research relating to the correlates and causes of delinquency. The advances in our understanding of the nature, correlates, and causes of juvenile crime are accompanied by progress in analyzing the treatment of youth in juvenile justice systems and in developing and evaluating alternative approaches to treatment. These efforts include research on decision making within juvenile justice systems and the development of screening and assessment tools. This also includes efforts to develop and evaluate effective prevention and treatment programs for use with youths involved in criminal activity and those at risk for this activity.

Treating the Juvenile Offender Robert D. Hoge, Nancy Guerra, Paul Boxer, 2008-01-01. This authoritative, highly readable reference and text is grounded in the latest knowledge on how antisocial and criminal behavior develops in youth and how it can effectively be treated. Contributors describe proven ways to reduce juvenile delinquency by targeting specific risk factors and strengthening young people's personal, family, and community resources. Thorough yet concise, the book reviews exemplary programs and discusses theoretical, empirical, and practical issues in assessment and intervention. It also provides best practice recommendations for working with special populations: violent offenders, gang members, sexual offenders, youth with mental health, substance abuse, educational, and learning problems, and female offenders.

possibility of abolition *Assessing the Youthful Offender* Robert D. Hoge, D.A. Andrews, 2013-05-06 Our society's preoccupation with crime and fear of crime appears to have shifted its focus to the juvenile offender Both electronic and print media continuously warn us that juvenile offenders are increasingly younger and more virulent The demographics of our population suggest that there will only be more juvenile offenders to fear in the near future All of these concerns arise in a social climate that is characterized by an ever increasing demand for stronger retributive measures against the offender The belief that only harsh justice will protect us from the ravages of juveniles has become dominant Increasingly perceptions and politics rather than scientific data dominate policy making with regard to youthful offenders In *Assessing the Youthful Offender Issues and Techniques* Robert D Hoge and D A Andrews make a restrained rational and ultimately persuasive argument for the use of standardized psychological assessments in the effective management of youth within juvenile justice systems They clarify how what we already know about the cause and management of youthful criminal activity can be incorporated into standardized testing and that the information obtained from testing can improve the administration of criminal justice Moreover this information is useful whatever the theoretical biases of those who administer the justice system The efficiency of policies of either retribution deterrence or rehabilitation is only enhanced by reliance on data
