Jennifer S. Uglow,2002 In the 1760s a group of amateur experimenters met and made friends in the Midlands Most came from humble families all lived far from the centre of things but they were young and their optimism was boundless together they would change the world Among them were the ambitious toy maker Matthew Boulton and his partner James Watt of steam engine fame the potter Josiah Wedgwood the larger than life Erasmus Darwin physician poet inventor and theorist of evolution a forerunner of his grandson Charles Later came Joseph Priestley discoverer of oxygen and fighting radical **The**

**Lunar Men** Jennifer Uglow,2009 Led by Erasmus Darwin the Lunar Society of Birmingham was a group of eighteenth century amateur experimenters The story brings to life this group of inventors artisans and tycoons who shaped and inspired the modern world and kick started the Industrial Revolution **Dragons** Liam Byrne,2016-05-26 Britain s rise to global

dominance from the 16th century owed as much to the vision and creativity of traders industrialists and bankers as it did to wars of conquest fought by military men DRAGONS tells the story of British business endeavour through the lives of ten titans of commerce Beginning with the Tudor merchants who transformed England s economy via trade with the New World Liam Byrne traces an entrepreneurial golden line through men such as Thomas Pitt saviour of the East India Company financier Nathan Rothschild creator of the modern bond market William Lever brand builder philanthropist and creator of Britain s first great multinational and John Spedan Lewis founder of the employee owned John Lewis Partnership At the start of the 21st century Britain remains a major economic power DRAGONS is both a rousing celebration of British business genius and a fascinatingly informative narrative of a neglected but essential strand of our island s story Bound to Please

**The Nonconformist Revolution** Amanda J Thomas,2020-05-30 A historian examines the evolution of dissenting thought and how it shaped the transformation of England from a rural to an urban industrialized society The foundations for the Industrial Revolution were in place from the late Middle Ages when the early development of manufacturing processes and changes in the structure of rural communities began to provide opportunities for economic and social advancement Successive waves of Huguenot migrants and the influence of Northern European religious ideology also played an important role in this process The Civil Wars would provide a catalyst for the dissemination of new ideas and help shape the emergence of a new English Protestantism and divergent dissident sects The persecution that followed strengthened the Nonconformist cause and for the early Quakers it intensified their unity and resilience qualities that would prove to be invaluable for

business The book proceeds to explore how in the years following the Restoration Nonconformist ideas fueled enlightened thought creating an environment for enterprise but also a desire for more radical change how reformers seized on the plight of a working poor alienated by innovation and frustrated by false promises and how the vision which was at first the spark for innovation would ignite revolution

*Railroad Men*, 1905 *The Well-Tuned Brain* Peter C. Whybrow, 2015-05-11 In this optimistic and inspiring book Peter Whybrow the prize winning author of *American Mania* returns to offer a prescription for genuine human progress *The Well Tuned Brain* is a call to action Swept along by the cascading advances of today's technology most of us take for granted that progress brings improvement Despite spectacular material advance however the evidence grows that we are failing to create a sustainable future for humanity We are out of tune with the planet that nurtures us Technology itself is not the problem as Whybrow explains but rather our behavior Throughout its evolution the ancient brain that guides us each day has been focused on short term survival But fortunately we are intensely social creatures Without the caring behaviors that flow from intimate attachments to others we would be relying on a brain that is only marginally adapted to the complexity of the problems we must now face together Today we must grapple with survival not in its immediacy but over the long term The first step in finding our way forward is to reexamine who we are as creatures of this planet To this end Whybrow takes us on a fascinating tour of self discovery drawing extensively upon his decades of experience as a psychiatrist and his broad knowledge of neuroscience and human behavior Illustrated throughout with engaging personal stories the book's trove of cutting edge science is enriched by philosophical historical and cultural perspectives What emerges is a summons to rediscover the essential virtues of earlier nurturing of mentored education and an engagement with the natural world through curiosity and imagination Neuroscience can open the search for a better future But technology alone will not save us To achieve success we will need the strength and wisdom of our better nature as humane social beings
