[A Theory of Religion](#) Rodney Stark, William Sims Bainbridge, 1987 This book offers the first modern theory of religion A deductive theory beginning with seven axioms about human nature and the world humans inhabit it derives hundreds of formal propositions about human religious behavior Included are the origins of religion the sources of religious commitment the development of religious institutions the emergence of religious movements and the postulation of good and evil gods Step by step the authors explain the social processes of recruitment to a group propagation of a faith and competition between denominations They show that secularization is a never ending process in which particular faiths are discredited while new faiths arise to take their place Thus religion is an eternal human response to the conditions of existence changing in form throughout history but always a vital part of culture and society

[More Than Belief](#) Manuel A. Vásquez, 2011 Over the past several decades postmodernist and postcolonial challenges to traditional theories and methods have revolutionized the social sciences The discipline of religious studies however has been relatively slow to confront these developments continuing to rely heavily on textual methods and a framework that privileges belief over practice doctrine

over performance text over context and inner emotion over public ritual Recently however developments in social theory have begun to transform the study of religion In this book Manuel V Squez maps out the dynamics of this paradigm shift exploring systematically the epistemological and methodological challenges contemporary social theory poses for traditional approaches to religious studies Offering a panoramic view of key debates on identity culture and society across the social sciences he assesses the impact of these debates on the study of religion offering specific examples of how they are shaping the study of particular religious traditions He concludes by proposing a robust yet flexible materialist approach to the study of religion that will be capable of addressing the increasing complexity of religious life

**Theory and Method in the Study of Religion** Carl Olson, 2003 This anthology provides students with a useful collection of theoretical essays concerning the nature of religion and the methodological means by which scholars analytically approach the subject Organized in a point counterpoint fashion this volume will foster in class discussion and the honing of a student's own critical perspectives

**Theories of Religion** Seth Daniel Kunin, Jonathan Miles-Watson, 2006 This book provides a comprehensive selection of readings that relate to and explore the definition of religion The texts come from a wide range of approaches unified both by the questions they are addressing and their broadly social scientific perspective The disciplines covered include anthropology phenomenology psychology and sociology The editors have also included some key texts relating to the feminist approach to and critique of religion The first section of the book includes some of the foundational texts such as materials by Marx Freud and Durkheim The remaining sections look at more recent discussions of the issues from the different disciplinary perspectives Each reading is introduced by a biographical sketch of the author The book also includes introductory discussions to each section that both raise the key issues developed in a particular discipline and address the disciplinary approaches from a more critical stance **Theories of Religion A Reader** is an invaluable critical resource accessible to a broad audience as well as students of theology and religious studies

**Religion, Theory, Critique** Richard King, 2017-07-18 Religion Theory Critique is an essential tool for learning about theory and method in the study of religion Leading experts engage with contemporary and classical theories as well as non Western cultural contexts Unlike other collections this anthology emphasizes the dynamic relationship between religion as an object of study and different methodological approaches and openly addresses the question of the manifold ways in which religion secular and culture are imagined within different disciplinary horizons This volume is the first textbook which seeks to engage discussion of classical approaches with contemporary cultural and critical theories Contributors write on the influence of the natural sciences in the study of religion the role of European Christianity in modeling theories of religion religious experience and the interface with cognitive science the structure and function of religious language the social scientific study of religion ritual in religion the phenomenology of religion critical theory and religion embodiment and religion the impact of colonialism and modernity theorizing religion in terms of race and ethnicity links among religion nationalism and globalization the interplay of gender

sex and religion and religion and the environment Each chapter introduces the topic identifies key theorists and issues and respects the pluralistic nature of the scholarship in the field Altogether this collection scrutinizes the explicit and implicit assumptions theorists make about religion as an object of analysis

Theory and Method in the Study of Religion, 2013-09-26 Theory and Method are two words that cause considerable consternation in the academic study of religion Although everyone claims to be aware of and to engage them the fact of the matter is that they remain poorly understood Some see the terms as irritants that get in the way of data interpretation and translation Others may invoke them sporadically to appear in vogue but then return quickly and myopically to their material and with little concern for the larger issues that such terms raise To contribute to these debates the present volume reproduces select articles from Method and Theory in the Study of Religion MTSR from the first 25 volumes of the journal and allows a group of younger scholars to introduce and review them asking if the issues raised are still relevant to the field Contributors include Matt Sheedy Robert A Segal James B Apple Neil McMullin Rebekka King Russell McCutcheon Craig Martin Donal Wiebe Emma Cohen Robert N McCauley E Thomas Lawson Steven Engler Mark Q Gardiner Bruce Lincoln Sarah E Rollens Burton Mack Yasmin Merchant Herb Bergh Jennifer Hall Darlene Juschka Ella Paldam and Armin Geertz

"Religion" in Theory and Practice Russell T. McCutcheon, 2018 Religion in Theory and Practice follows on from McCutcheon's 2014 Equinox book Entanglements Marking Place in the Field of Religion by offering both an overview of the current state of theory in the academic study of religion as well as examining a variety of practical sites where critical scholarship is implemented but also challenged Although addressed to early career scholars taking one reviewer of Entanglements seriously by adding to the meager genre of books directed toward these important readers the volume should also be of interest to anyone curious about why many in the study of religion continue to assume that their object of study needs special attention The first section outlines McCutcheon's broader and more recent thoughts on the current state of the field such as the claims by some that the field is now post theory while the second section applies the first at a variety of discrete sites within the profession These include how we approach teaching the introductory course the work carried out in professional associations and conferences the ongoing problem of contingent labor and what faculty might be able to do about it the challenge of talking about what a theoretically engaged scholar of religion actually does and the varied audiences and readers who we can now try to reach with our work Drawing on previously published but revised material for four of the ten chapters the volume invites readers to step back from their own individual specialized work so as to consider some of the wider structures in which the wider field exists and where all of our work is carried out
