general practice physicians may provide the majority of acute stroke care We will provide the reader with all the data necessary to understand the utility and limitations of thrombolytic therapy By reading the protocols and working through the case tutorials the reader will become sufficiently familiar with the indications and contraindications of thrombolytic therapy to begin evaluating potential patients Although nothing can replace direct instruction by more experienced physicians we hope that by imparting our accumulated knowledge we may guide those physicians who cannot attend a hands on workshop or who having heard the appropriate lectures feel the need for further guidance We will review the scientific rationale for thrombolysis first most ischemic stroke is caused by thrombo emboli second a portion of brain the penumbra remains salvageable for a few hours after vascular occlusion and third promptly delivered thrombolysis can remove the offending occlusion and restore cerebral blood flow to the penumbra in time to salvage brain and neurologic function Then we will review the preclinical development of thrombolytics for stroke patients and the early pilot trials Next we will present the pivotal clinical trials that demonstrated the efficacy and safety of thrombolysis

Occupational Therapy for Stroke Rehabilitation Simon B. N. Thompson, Maryanne Morgan, 2013-12-20 This book is both an introductory text to the rehabilitation of stroke for student therapists and a reference text for qualified therapists The layout of the book reflects these needs with Chapters 1-4 assuming a minimal level of understanding of the material These chapters provide an introduction to the condition of stroke itself the problem therapists face in assessing and treating stroke patients and therapeutic approaches in occupational therapy Prognosis of stroke is also discussed which is an issue taken up in later chapters concerned with expert systems The use of microcomputers in occupational therapy is discussed throughout the book with particular reference to their direct role during therapy Chapters 5-7 assume a higher level of understanding from the reader although students will find the material useful as an insight into the work of the modern day therapist Chapter 5 addresses the work carried out in the area of biofeedback Chapter 6 introduces the concept and uses of databases and Chapter 7 discusses the versatility of microcomputers especially in the provision of expert systems for the prognosis of stroke

Balloon and Stent for Ischemic and Hemorrhagic Stroke: A New Trend for Stroke Prevention and Management Firas Al-Ali, 2015-11-09 In recent years intracranial endovascular use of Balloon and Stent has grown significantly This issue will focus primarily on recent advances in the use of these methods today This discussion will also highlight our improvements in understanding the disease process and not only relying on devices to treat a patient Wide necked intracranial aneurysms IA were originally thought to be either untreatable or at the very least significantly challenging to treat by endovascular means due to the risk of coil protrusion and possibly parent vessel occlusion However this view now outdated today and we will discuss the significant advancement in different flow diverters The treatment of post sub arachnoid hemorrhage vasospasm is mature now as this issue will highlight In addition Intracranial atherosclerosis is still a prominent cause of stroke in various populations worldwide This issue will summarize the challenges of risk factor modification and secondary stroke prevention

by defining optimal methods We will try to outline a new approach for intracranial angioplasty and stenting for stroke prevention Finally despite recent impressive increase recanalization rates in acute ischemic stroke treatment the clinical improvement rate has remained relatively stable This article will discuss a new means of improving patient selections using the capillary index score CIS The future of our specialty relies heavily on better devices and on a deeper understanding of the disease process The future is bright and we have already taken the first successful steps
