Window On Yesterday:

Syntax Talmy Givón, 2001 This new edition of *Syntax A functional typological introduction* is at many points radically revised In the previous edition 1984 the author deliberately chose to de emphasize the more formal aspects of syntactic structure in favor of a more comprehensive treatment of the semantic and pragmatic correlates of syntactic structure With hindsight the author now finds the de emphasis of the formal properties a somewhat regrettable choice since it creates the false impression that one could somehow be a functionalist without being at the same time a structuralist To redress the balance explicit treatment is given to the core formal properties of syntactic constructions such as constituency and hierarchy phrase structure grammatical relations and relational control clause union finiteness and governed constructions At the same time the cognitive and communicative underpinning of grammatical universals are further elucidated and underscored and the interplay between grammar cognition and neurology is outlined Also the relevant typological database is expanded now exploring in greater precision the bounds of syntactic diversity Lastly *Syntax* treats synchronic typological diversity more explicitly as the dynamic by product of diachronic development or grammaticalization In so doing a parallel is drawn between linguistic diversity and diachrony on the one hand and biological diversity and evolution on the other It is then suggested that as in biology synchronic universals of grammar are exercised and instantiated primarily as constraints on development and are thus merely the apparent by products of universal constraints on grammaticalization Rough Notes Henry C. On Meaning Maria Isabel Aldinhas Ferreira, 2011-05-25 Meaning the complex phenomenon of individuation and the definition of identity are the core theme of this work Grounded on a theoretical framework that gives particular emphasis to the semiotic process common to all forms of cognition human cognition is conceived here as specific of organisms that in the course of their interactions produce symbolic forms defining the specific physical social and cultural environments in which they evolve Individuation inherent to that semiotic process is complex and double sided It involves on one hand the definition of semantic identities and their acknowledgment as world objects naming on the other hand it comprehends the specific lexical and morphosyntactic strategies different languages have found to designate particular entities referring The definition of world objects and its symbolic translation presents variations from language to language In the second part of the book we define what we have called a structure motivated ontology to represent how this symbolic translation is accomplished in English and European Portuguese Plus we try to show how the nature of this symbolic translation affects structural realisation namely the individuation of reference and the construal of one off referring expressions The Tenants of Malory Joseph Sheridan Le Fanu, 1890 *Syntax of Dutch: Adjectives and Adjective Phrases* Hans Broekhuis, 2025-10-01 The *Syntax of Dutch* will be published in at least seven volumes in the period 2012 2016 and aims at presenting a synthesis of the

currently available syntactic knowledge of Dutch It is primarily concerned with language description and not with linguistic theory and provides support to all researchers interested in matters relating to the syntax of Dutch including advanced students of language and linguistics The volume Adjectives and Adjective Phrases discusses the internal make up as well as the distribution of adjective phrases Topics that will be covered include complementation and modification of adjective phrases comparative and superlative formation the attributive predicative and adverbial uses of adjective phrases Special attention is paid to the so called partitive genitive construction and the adverbial use of past passive participles and infinitives
