Reading Apollinaire's Calligrammes Willard Bohn, 2018-01-25 Reading Apollinaire's Calligrammes examines Guillaume Apollinaire's second major collection of poetry. Composed between 1913 and 1918, the nineteen poems examined here fall into two main groups: the experimental poetry and the war poetry. They also provide glimpses of the poet's personal history from his affair with Louise de Coligny Ch tillon to his engagement to Madeleine Pag's and his marriage with Jacqueline Kolb. Each section examines all of the previous scholarship for the work in question, provides a detailed analysis, and in many cases offers a new interpretation. Each poem is subjected to a meticulous line-by-line analysis in the light of current knowledge.

Une fenêtre ouverte sur la création Cynthia B. Kerr, John C. Lapp, 1983 Fenêtres Dans la Conception Et la Maintenance Du Bâtiment, Göteborg, Suède, Du 13 Au 15 Juin 1984, 1984 Rapporten som r i 2 delar innehåller de flesta av inläggen vid den internationella fönsterkonferensen i Göteborg juni 1984. Inläggen behandlar praktiskt taget alla nyheter beträffande fönster som text material, klimatfaktorer, energibalans, ljud och brandskydd.

One Poem in Search of a Translator Eugenia Loffredo, Manuela Perteghella, 2009 Translation is a journey, a journey undertaken by the text hopping around the world and mischievously border crossing from one language to another, from one culture to another. For a translator, this journey can become a truly creative engagement with the otherness of the source text, an experience of self-discovery leading to understanding and enrichment, and ultimately towards a new text. This singular literary experiment intends to magnify the idiosyncrasy of this translational journey. In the process, translation reveals itself as an increasingly creative activity rather than simply a linguistic transfer. This volume consists of twelve translations of one poem, *Les Fenêtres*, by the French poet Apollinaire. The translators embarking on this project all from different backgrounds and working contexts: poets, professional translators, academics, visual artists were asked to engage with the inherent multimodality of this poem inspired by Robert Delaunay's *Les Fenêtres* series of paintings. The result is a kaleidoscopic diversity of approaches and final products. Each translation is accompanied by self-reflective commentary which provides insight into the complex process and experience of translation, enticing the reader to join this journey too.

The French principia. 3 pt. [and] Key [in 8 pt. Pt. 2, 3 by P.H.E. Brette]. French principia, 1886 Cinematic Aided Design François Penz, 2017-08-14 *Cinematic Aided Design: An Everyday Life Approach to Architecture* provides architects, planners, designer practitioners, politicians, and decision makers with a new awareness of the practice of everyday life through the medium of film. This novel approach will also appeal to film scholars and film practitioners with an interest in spatial and architectural issues, as well as researchers from cultural studies in the field of everyday life. The everyday life is one of the hardest things to uncover, since by its very nature it remains overlooked and ignored. However, cinema has over the last 120 years represented, interpreted, and portrayed hundreds of thousands of everyday life situations taking place in a wide range of dwellings, streets, and cities. Film constitutes the most comprehensive lived-in building data in existence. Cinema created a comprehensive encyclopedia of architectural

spaces and building elements It has exposed large fragments of our everyday life and everyday environment that this book is aiming to reveal and reconstitute

Agricultural Index, 1920 *Biological & Agricultural Index*, 1922 **Dictionary of Building and Civil Engineering**, 2013-12-20

In the last few decades civil engineering has undergone substantial technological change which has naturally been reflected in the terminology employed in the industry Efforts are now being made in many countries to bring about a systematization and unification of technical terminology in general and that of civil engineering in particular The publication of a multilingual dictionary of civil engineering terms has been necessitated by the expansion of international cooperation and information exchange in this field as well as by the lack of suitable updated bilingual dictionaries This Dictionary contains some 14 000 English terms together with their German French Dutch and Russian equivalents which are used in the main branches of civil engineering and relate to the basic principles of structural design and calculations the elasticity theory strength of materials soil mechanics and other allied technical disciplines to buildings and installations structures and their parts building materials and prefabrications civil engineering technology and practice building and road construction machines construction site equipment housing equipment and fittings including modern systems of air conditioning as well as to hydrotechnical and irrigation constructions The Dictionary also includes a limited number of basic technical expressions and terms relating to allied disciplines such as architecture and town planning as well as airfield railway and underground construction The Dictionary does not list trade names of building materials parts and machines or the names of chemical compounds Nor does it give adverbial adjective or verbal terms
