CarolinaEast fought COVID through 2020

America's healthcare givers have learned a lot as they tackled a mysterious, oddly behaving virus that blossomed and slayed and is only now starting to come under control with the arrival of vaccines against it.

CarolinaEast has been at the forefront of the battle since its first hit American shores on January 21, more than a year ago, and like every health center from small community hospitals to the Mayo Clinic, had to learn from scratch how

to deal with the crisis.

Through trial and error and careful research, the hospital has developed a treatment that helps patients fight their way through the virus and that has improved recovery and survival.

"The first email we sent out about COVID-19 was on January 20," Jim Davis, vice president of nursing, said. Already the hospital was starting to limit some procedures in preparation for an expected boom in virus patients.

The pandemic planning continued as the hospital shut down all elective surgeries on March 24. A COVID unit was

put together as rooms were converted to handle the highly contagious virus — more would be added as numbers of patients climbed.

It was a few weeks before the first case showed up in the county — the first North Carolina case was on March 3 and, while people started showing up and testing positive at the hospital's emergency room, a COVID patient was not actually admitted until March 31.

The first Craven County fatality was especially hard on hospital staff because it was one of their own. While working the

HISTORY

In 1958 they dropped an A-bomb in SC

Bill Hamd
New Bern Sun Journal
USA TODAY NETWORK

The Carolina dance with death that happened in Goldsboro in 1966 wasn't the first.

You recall our story of the nuclear bomb that drifted from a B-52 after it disintegrated in the air near Goldsboro? One bomb's chute opened, and it landed in a tree its nose just inches from the ground and its 6 of its 7 arming switches thrown, while its bomb bay mate buried itself 200 feet under the ground. That second bomb is still buried out there today, incapable of exploding but very much radioactive.

This B-47 bomber on display with the Mighty 8th Air Force Museum in Savannah is similar to the one that dropped an atom bomb near Florence, SC in 1958. Luckily its detonator was not installed its explosion was not nuclear. (Drew Torres)

"6-06, US bombers flew around the clock from the US to Europe and back, loaded with nuclear bombs, as part of a deterrent against Russian attack. On March 11, four B-47Es were taking part in a mock bombing run over England to test their accuracy. Since our boys dropped theirs in South Carolina, I doubt they scored very

high.

The aircraft were carrying actual bombs in case, while on their training mission, they were suddenly called to actual war. The bomb was an MK 6 nuclear bomb, which has been described to me as being similar to the one dropped on Nagasaki (see Famous than Hiroshima's bomb, but bigger) in 1945.

According to an article in the Florence County Museum website our B-47E had barely taken off when the co-pilot pulled a lever that was supposed to "engage a locking pin in the plane's bomb bay doors, thus keeping the bombs extra secure." When the light showing the task was completed didn't come on, he sent

navigator Bruce Kukka to fix it. Bruce was a height-challenged kind of guy and an MK 6 was a pretty big boy. To inspect the locking pin, he had to hoist himself up on top of the bomb. While doing so he made the little mistake of bomb's emergency release mechanisms.

What happened next came within inches of satirizing the Slim Pickens riding-the-phoenixing "A-Bomb" scene in Dr. Strangelove: the bomb released and he and the 7,000-pound bomb fell down against the bomb bay doors. The doors popped open under the sudden weight and our MK 6 headed for a South Carolina farm field.

Luckily, Bruce managed to grab hold of something and stay in the jet: there's only so much like Slim Pickens that you want to be.

There were two things that made this event not quite as potentially disastrous as the Goldsboro event to follow: first, the bomb was much smaller, though it still could have made for a very bad day in Florence and any city opposed (possibly including New Bern). Second, the MK 6 is not nuclear at all if its core is installed — and that core was stored separately in a thing called a "birdcage," to be added to the bomb only moments before it was to be intentionally dropped. That
