Sunship Earth Steve Van Matre, 1979 A guide to a five day program designed to help elementary age children understand their world by using all five senses

Diversity in Environmental Education Research, 2009-01-01 Research in environmental education EE is a growing field of inquiry and should be seen as respondent to a variety of program developments around the world These diverse programs are the context for this body of educational research Diversity in EE research is also compounded when one considers the various cultures epistemologies and research traditions that may inform the field This complexity accounts for the range of forms for environmental learning in formal informal or non formal contexts There is a good deal of evidence that in order to be more responsive to the needs of diverse populations program developments around the world are now beginning to reflect the variation in our society However the same cannot always be said in terms of research methodologies within mainstream environmental education research Outside of a few examples there seems to have been very little in the way of development of research genres aimed at understanding characterizing and supporting cultural diversity within much of mainstream environmental education Diversity of method may also be important for the overall quality or health of environmental education research To locate many of the new ideas and approaches in this area one needs to look outside environmental education towards general educational research or to other fields such as environmental justice indigenous education science education and health education to name only a few examples This volume of original research reports from around the globe begins to richly describe aspects of diversity in environmental education research It does so in two ways first it mirrors the diversity of voices and cultures that are conducting research in this ever broadening and increasingly global and international field of inquiry second it illuminates a potential diversity of research methods by highlighting a range of methodologies salient in other fields which have emerging promise for the practice of research in environmental education

Sustainable Communities, Sustainable Environments, 2007-01-01 Sustainable Communities Sustainable Environments What is enacted when we engage with these ideas Sustainability is a term increasingly used to describe the broader purpose and goal for education as we move further into the UN declared Decade of Education for Sustainable Development UNDESD This book provides a variety of international perspectives from the traditional fields of science and technology education as teachers primary through tertiary teacher educators and academic researchers engage with this topic The book provides a collection of new works which will help to describe for educators what it is we develop and what it is we sustain when we engage in education for sustainable development ESD
