Technological Systems:

Technological Systems and Industrial Dynamics B. Carlsson, 1997-06-30 This volume constitutes a summary of several years multi disciplinary research by a group of Swedish researchers The project Sweden s Technological Systems and Future Development Potential was initiated by the Swedish National Board for Industrial and Technical Development NUTEK and has been carried out at the Department of Industrial Management and Economics at Chalmers University of Technology in Gothenburg the Research Policy Institute at the University of Lund the Industrial Institute for Economic and Social Research IUI in Stockholm and the Department of Industrial Economics and Management at the Royal Institute of Technology Stockholm under the direction of Bo Carlsson Case Western Reserve University Cleveland Ohio The project group decided early on to focus first on the technological system for factory automation a relatively mature system of great importance to Swedish industry and in which Sweden has reached a leading position internationally and then to shift the attention to other systems in various stages of development and with varying Swedish strength The work on factory automation resulted in numerous papers and publications summarized in a volume published in 1995 **Technological Systems and Economic Performance The Case of Factory Automation** ed Bo Carlsson Dordrecht [The Social Construction of Technological Systems, anniversary edition](#) Wiebe E. Bijker, Thomas Parke Hughes, Trevor Pinch, 2012-05-18 An anniversary edition of an influential book that introduced a groundbreaking approach to the study of science technology and society This pioneering book first published in 1987 launched the new field of social studies of technology It introduced a method of inquiry social construction of technology or SCOT that became a key part of the wider discipline of science and technology studies The book helped the MIT Press shape its STS list and inspired the Inside Technology series The thirteen essays in the book tell stories about such varied technologies as thirteenth century galleys eighteenth century cooking stoves and twentieth century missile systems Taken together they affirm the fruitfulness of an approach to the study of technology that gives equal weight to technical social economic and political questions and they demonstrate the illuminating effects of the integration of empirics and theory The approaches in this volume collectively called SCOT after the volume s title have since broadened their scope and twenty five years after the publication of this book it is difficult to think of a technology that has not been studied from a SCOT perspective and impossible to think of a technology that cannot be studied that way **The Ongoing Technological System** Smail Ait-El-Hadjait, 2017-10-09 The high level of innovation currently transforming our society and its technological dynamics can be seen as a second wave of innovation of the third technological system which emerged in the late 1970s This book discusses the concept of technological systems focusing on the tools used for formalizing the organization of technology in society and its dynamics of evolution The author uses these tools to characterize the contemporary technological system and to model its specific dynamics In doing so he raises questions about the continuity of the current technological system and its capacity to generate powerful innovatory movements [Technological Systems and](#)

Economic Performance: The Case of Factory Automation B. Carlsson, 2012-12-06 In 1987 the Swedish National Board for Technical Development STU later becoming the Swedish National Board for Industrial and Technical Development NUTEK initiated a study of Sweden's Technological Systems and Future Development Potential A comprehensive interdisciplinary study was envisioned yielding not only useful insight but also a permanent competence base for future analyses of technological systems and technology policy in Sweden Three leading Swedish research institutes were invited to participate the Industrial Institute for Economic and Social Research in Stockholm the Department of Industrial Management and Economics at Chalmers University of Technology in Gothenburg and the Research Policy Institute at the University of Lund I was invited to direct the project The project group decided to focus initially on a particular technological system namely factory automation to be followed by similar studies of other systems Numerous publications have resulted from the project thus far The current volume represents a summary of our work on factory automation It consists of several original essays and of some previously published papers which have been edited in some cases substantially in order to form a comprehensive and coherent picture of a technological system To our knowledge this is the first in depth analysis of a technological system designed as a component of a systematic study of technological systems more generally At the time of this writing three further studies on electronics and computers pharmaceuticals and powder technology are under way to be published in a later volume
