That Is Funny:

A Philosophy of Humour Alan Roberts, 2019-04-13 Humour is a funny thing everyone knows it but no one knows what it is This book addresses the question What is humour by first untangling the definitions of humour amusement and funniness before then providing a new theory of humour which draws upon recent research in philosophy psychology linguistics and neuroscience The theory is built up without assuming any prior knowledge and illustrated through humorous examples which are both entertaining and educational for anyone curious about what makes things funny The book is then an accessible illumination of joking matters from dinner tables to online platforms to comedy clubs *Create Captivating Classes* J.

Christopher Bontjes, 2013-10-08 It s a challenge every teacher faces finding ways to get and keep the attention of their students getting them to engage fully in the lessons In today s world of constant connection to media and entertainment through television and the Internet it is harder than ever Add to that the pressures of NCLB Common Core State Standards and the Danielson evaluation model putting full responsibility for student learning and growth on the teacher and we have reached a crisis How can teachers compete with this constant stream of personalized entertainment They must learn to think and teach as entertainers This is not as revolutionary a concept as it may sound The word entertain is defined as to pleasantly hold attention So teachers already entertain their students So no problem right Wrong Teachers are now competing for the attention of their students And the competition is fierce They are up against professional entertainers who have spent years studying the art of entertainment without having to worry about teaching as well Teachers are trained in their subjects but not in the methods and techniques used by entertainment professionals Teachers must learn to plan and to think as the professional entertainers do Only then can they effectively compete Only then can they *Create Captivating Classes* Christopher Bontjes has more than 40 years of experience in designing shows and entertaining audiences of all ages from the stage He also has more than 25 years of experience as a classroom teacher Because his teaching specialty is music he has had the opportunity to teach students ranging in age from Kindergarten through adult In *Create Captivating Classes* Why NCLB Should Mean No Child Left Bored Bontjes shares the techniques used by entertainment professionals to keep audiences glued to their seats and begging for more He then applies each technique to the classroom showing teachers step by step how to use each idea in the classroom to keep students riveted to lessons and anxious to learn more These ideas and techniques are effective with all students They work regardless of age or socio economic background They work not because of who students are but because of what students are HUMAN Every teacher has students they struggle to reach *Create Captivating Classes* will add a myriad of new ideas to your educational bag of tricks Order your copy today and learn to *Create Captivating Classes* **Did You Know This?** Rosemary LeRoy, 2011-07-22 Book is about some of the things some people in the entertainment world do on a daily regular basis you may not have heard of I was married to a man who worked for a famous country rock band My eyes were opened to a whole other world of goings on that I knew little about Some do

such wacky wrong things it is hard to believe even if they are in the entertainment world Some do not want people to know and some are so out there that they do want people to know what they do because it would help their image Believe it or not

Emptiness and Omnipresence Brook A. Ziporyn, 2016-05-02 This rich and rewarding work explores the connections between ancient Buddhist doctrine and contemporary philosophy Publishers Weekly Tiantai Buddhism emerged in sixth century China from an idiosyncratic and innovative interpretation of the Lotus Sutra It went on to become one of the most complete systematic and influential schools of philosophical thought developed in East Asia In *Emptiness and Omnipresence* Brook A Ziporyn puts Tiantai into dialogue with modern philosophical concerns to draw out its implications for ethics epistemology and metaphysics Ziporyn explains Tiantai's unlikely roots its positions of extreme affirmation and rejection its religious skepticism and embrace of religious myth and its view of human consciousness Ziporyn reveals the profound insights of Tiantai Buddhism while stimulating philosophical reflection on its unexpected effects **Beyond Oneness and**

Difference Brook Ziporyn, 2013-10-29 *Beyond Oneness and Difference* considers the development of one of the key concepts of Chinese intellectual history Li A grasp of the strange history of this term and its seemingly conflicting implications as oneness and differentiation as the knowable and as what transcends knowledge as the good and as the transcendence of good and bad as order and as omnipresence raises questions about the most basic building blocks of our thinking This exploration began in the book's companion volume *Ironies of Oneness and Difference* which detailed how formative Confucian and Daoist thinkers approached and demarcated concepts of coherence order and value identifying both ironic and non-ironic trends in the elaboration of these core ideas In the present volume Brook Ziporyn goes on to examine the implications of Li as they develop in Neo-Daoist metaphysics and in Chinese Buddhism ultimately becoming foundational to Song and Ming dynasty Neo-Confucianism the orthodox ideology of late imperial China Ziporyn's interrogation goes beyond analysis to reveal the unsuspected range of human thinking on these most fundamental categories of ontology metaphysics epistemology and ethics

Properties and Propositions Robert Trueman, 2021-01-07 This book articulates and defends Fregean realism a theory of properties based on Frege's insight that properties are not objects but rather the satisfaction conditions of predicates Robert Trueman argues that this approach is the key not only to dissolving a host of longstanding metaphysical puzzles such as Bradley's Regress and the Problem of Universals but also to understanding the relationship between states of affairs propositions and the truth conditions of sentences Fregean realism Trueman suggests ultimately leads to a version of the identity theory of truth the theory that true propositions are identical to obtaining states of affairs In other words the identity theory collapses the gap between mind and world This book will be of interest to anyone working in logic metaphysics the philosophy of language or the philosophy of mind **Putnam's & the Reader**, 1908 *"The"*
