Bursting the Bubble: Rationality in a Seemingly Irrational Market David F. DeRosa, 2021-04-02 The presence of speculative bubbles in capital markets an important area of interest in financial history is widely accepted across many circles Talk of them is pervasive in the media and especially in the popular financial press Bubbles are thought to be found primarily in the stock market which is our main interest although bubbles are said to occur in other markets Bubbles go hand in hand with the notion that markets can be irrational The academic community has a great interest in bubbles and it has produced scholarly literature that is voluminous For some economists doing bubble research is like joining the vanguard of a Kuhnian paradigm shift in economic thinking Not so fast If bubbles did exist they would pose a serious challenge to neoclassical finance Bubbles would contradict the ideas that markets are rational or work in an informationally efficient manner That's what makes the topic of bubbles interesting This book reviews and evaluates the academic literature as well as some popular investment books on the possible existence of speculative bubbles in the stock market The main question is whether there is convincing empirical evidence that bubbles exist A second question is whether the theoretical concepts that have been advanced for bubbles make them plausible The reader will discover that I am skeptical that bubbles actually exist But I do not think I or anyone else will ever be able to conclusively prove that there has never been a bubble From studying the literature and from reading history I find that many famous purported bubbles reflect inaccurate history or mistakes in analysis or simply cannot be shown to have existed In other instances bubbles might have existed But in each of those cases there are credible rational explanations And good evidence exists for the idea that even if bubbles do exist they are not of great importance to understanding the stock market

The Escape from Balance Sheet Recession and the QE Trap Richard C. Koo, 2014-10-27 Compare global experiences during the balance sheet recession and find out what is needed for a full recovery. *The Escape from Balance Sheet Recession and the QE Trap* details the many hidden dangers remaining as the world slowly recovers from the balance sheet recession of 2008. Author and leading economist Richard Koo explains the unique political and economic pitfalls that stand in the way of recovery from this rare type of recession that was largely overlooked by economists. Koo anticipated the current predicament in the West long before others and issued warnings in his previous books, *Balance Sheet Recession* and *The Holy Grail of Macroeconomics*. This new book illustrates how history is repeating itself in Europe while the United States, which learnt from the Japanese experience, is doing better by avoiding the fiscal cliff. However, because of the liberal dosage of quantitative easing already implemented in the United States, the United Kingdom, and Japan may face a treacherous path to normalcy in what Koo calls the QE Trap. He argues that it is necessary to understand balance sheet recession in order to resolve the Eurozone crisis, particularly the competitiveness problems. Koo issues warnings against those who are too ready to argue for structural reforms when the problems are actually with balance sheets. He re-examines Japan's two decades of experiences with this rare recession and offers an insider view on the Abenomics. On China, readers will gain a very different historical perspective as Koo argues that western commentators have forgotten their own history when they talk about the rebalancing of the Chinese economy. Learn from Japan, which experienced the same predicament afflicting the West fifteen years earlier. Discover how unwinding of quantitative easing will affect the United States, the United Kingdom, Japan, as well as the emerging world. Examine solutions to the Eurozone problems caused by two balance sheet recessions, eight years apart. Gain insight into China's problems from the West's own experiences with urbanisation. Koo, who developed the concept of balance sheet recession based on Japan's experience, took the revolution in macroeconomics started by John Maynard Keynes in 1936 to a new height. *The Escape from Balance Sheet Recession and the QE Trap* offers the world cure for balance sheet recession.

Rise and Burst of the Dotcom Bubble Christian Wollscheid, 2012-07-11 Seminar paper from the year 2012 in the subject Business Economics, Banking, Stock Exchanges, Insurance, Accounting, grade 1.3, Technical University of Applied Sciences, Mittelhessen, language: English, abstract: The Dotcom bubble, also known as the Internet bubble or the Information technology bubble, was a speculative bubble of stock prices of mainly American Internet companies during the time from 1995 until 2000 when many investors believed that a new era was upon them. In only two years, the Internet sector grew over

1000% of its public equity and equalled nearly 6% of the market capitalization of the United States and over 20% of all public traded equity volume in the US It had its peak on March 10 2000 with a NASDAQ score of 5 048 62 This period was characterized by lots of establishments of companies in the Internet sector They were called Dotcom Companies because of the com in the end of an URL that comes from the word commercial The bubble burst during the years 2000 until 2002 when the NASDAQ lost nearly 80% of its value many companies like Pets com failed completely and over 7 trillion in market value were destroyed With this paper the author tries to explain the rise and fall of Internet stock prices during that period For this purpose the general causes and characteristics of financial bubbles get described before the application to the Dotcom bubble follows Additionally some company examples and survivors and losers of the bubble like pets com Webvan or Ebay get introduced Because the bubble mainly took place in the United States the author will focus on American company examples and the American stock exchange *The Internet* Laura Lambert,Chris Woodford,Christos J.
