**Artificial Intelligence for Materials Science** Yuan Cheng, Tian Wang, Gang Zhang, 2021-03-26 Machine learning methods have lowered the cost of exploring new structures of unknown compounds and can be used to predict reasonable expectations and subsequently validated by experimental results As new insights and several elaborative tools have been developed for materials science and engineering in recent years it is an appropriate time to present a book covering recent progress in this field Searchable and interactive databases can promote research on emerging materials Recently databases containing a large number of high quality materials properties for new advanced materials discovery have been developed These approaches are set to make a significant impact on human life and with numerous commercial developments emerging will become a major academic topic in the coming years This authoritative and comprehensive book will be of interest to both existing researchers in this field as well as others in the materials science community who wish to take advantage of these powerful techniques The book offers a global spread of authors from USA Canada UK Japan France Russia China and Singapore who are all world recognized experts in their separate areas With content relevant to both academic and commercial points of view and offering an accessible overview of recent progress and potential future directions the book will interest graduate students postgraduate researchers and consultants and industrial engineers

**What is Present Reality** Vipin Gupta, 2021-02-16 What is present reality is an incredibly profound but

straightforward exposition of the limits of science Every scientist wishes that someone will falsify the world crafted using the present body of scientific methods one day One such world comprises the manifold versions of relativity theories measuring  $E = mc^2$  Suppose one deified scientist had not mathematically derived the value of energy in this way In that case today s scientists will not bind their understanding to the light serviced by the deified leader scientist traded and squared by them as a devoted follower Evidently when one conceives energy as  $mc^2$  its value without the presence of the leader deity is zero This landmark work grounded in India s ancient cultural metaphysics challenges the present reality of what we know and believe to be true whether about divinity or spirituality or the universe of objects or subjects or us as a person A unique feature is the precise quantification of the lightless energies of both the present reality as well as the varying paradigms and doctrines working on modifying that It is a part of a series of twelve books that democratizes the ability to understand our present reality beyond those who are experts in modern science and use this understanding for personal as well as societal well being The beta reviewers note This is unbelievable work that would change the way life is seen and lived and Looking forward to this being a massive success Dr Vipin Gupta has a Ph D in managerial science and applied economics from the Wharton School of the University of Pennsylvania He is a gold medalist from the Post graduate Program of the Indian Institute of Management Ahmedabad India He is a Professor of sensible management and appropriate science at the Jack H Brown College of Business and Public Administration California State University San Bernardino USA
