## **The Management Science System:**

### **Some Developments in Management Science and Information Systems with Respect to Measurement in**

**Accounting** Carnegie Institute of Technology. School of Industrial Administration, Neil Churchill, Andrew Stedry, 1965  
Developing techniques in management science behavioral science and information systems are discussed in the context of accounting measurement Data requirements for implementation of the new planning and control techniques are considered and compared with data furnished by accounting reports Input data and aggregation in contemporary information systems are compared with recording and classification in conventional accounting systems It is proposed that accounting measurement principles be developed for data in micro units much smaller than the transaction which serve as data inputs in on line real time information systems It is also proposed that accounting measurement principles be extended to include non monetary units and in particular to evaluating the measurement procedures used in determining the macro units much larger than the transaction which serve as inputs for planning and control techniques developed in the management and behavioral sciences Author **Realising Systems Thinking: Knowledge and Action in Management Science** John

Mingers, 2006-09-13 This book deals with the contribution of a systems approach to a range of disciplines from philosophy and biology to social theory and management It weaves together material from some of the pre eminent thinkers of the day In doing so it creates a coherent path from fundamental work on philosophical issues of ontology and epistemology through specific domains of knowledge about the nature of information and meaning human communication and social intervention

Thompson Klein,W. Grossenbacher-Mansuy,R. Häberli,A. Bill,R.W. Scholz,M. Welti,2012-12-06 What kind of science do we need today and tomorrow In a game that knows no boundaries a game that contaminates science democracy and the market economy how can we distinguish true needs from simple of fashion How can we distinguish between necessity and fancy whims How can we differentiate conviction from opinion What is the meaning of this all Where is the civilizing project Where is the universal outlook of the minds that might be capable of counteracting the global reach of the market Where is the common ground that links each of us to the other We need the kind of science that can live up to this need for univer sality the kind of science that can answer these questions We need a new kind of knowledge a new awareness that can bring about the creative destruction of certainties Old ideas dogmas and out dated paradigms must be destroyed in order to build new

knowledge of a type that is more socially robust more scientifically reliable stable and above all better able to express our needs values and dreams What is more this new kind of knowledge which will be challenged in turn by ideas yet to come will prove its true worth by demonstrating its capacity to dialogue with these ideas and grow with them
