Theorising Media and Practice Birgit Bräuchler, John Postill, 2010-11-01 Although practice theory has been a mainstay of social theory for nearly three decades so far it has had very limited impact on media studies This book draws on the work of practice theorists such as Wittgenstein Foucault Bourdieu Barth and Schatzki and rethinks the study of media from the perspective of practice theory Drawing on ethnographic case studies from places such as Zambia India Hong Kong the United States Britain Norway and Denmark the contributors address a number of important themes media as practice the interlinkage between media culture and practice the contextual study of media practices and new practices of digital production Collectively these chapters make a strong case for the importance of theorising the relationship between media and practice and thereby adding practice theory as a new strand to the study of anthropology of media

Theories of Learning and Studies of Instructional Practice Timothy Koschmann, 2011-04-19 This is a book about an attempt to change the way math was taught in a particular classroom Its title plays on our everyday usage of the terms theory and practice In education these terms are conventionally treated oppositionally we have theories about what we should do and we have what teachers actually do do In this way theory stands prior logically and chronologically to practice practice inevitably becoming theory s imperfect realization We seek in this volume however to develop a different stance with regard to the relationship between the two Taking the details of instructional practice as our principle object of study we explore what role theories of learning might play in illuminating such practices The book is about actual practices by which teaching is done and how contemporary theories of learning might help us understand those practices It seeks to provide a foundation for future practice based inquiry in education by addressing the methodological question How do we go about studying instructional practice in a principled way

Documentary Julian Stallabrass, 2013 Part of the acclaimed Documents of Contemporary Art series of anthologies Documentary has undergone a marked revival in recent art following a long period in which it was a denigrated and unfashionable practice This has in part been led by the exhibition of photographic and video work on political issues at Documenta and numerous biennials and since the turn of the century issues of injustice violence and trauma in increasing zones of conflict Aesthetically documentary is now one of the most prominent modes of art making in part assisted by the linked transformation and recuperation of photography and video by the gallery and museum world
