Lehmann, 2011-07-25 Classical statistical theory hypothesis testing estimation and the design of experiments and sample
surveys is mainly the creation of two men Ronald A Fisher 1890 1962 and Jerzy Neyman 1894 1981 Their contributions
sometimes complemented each other sometimes occurred in parallel and particularly at later stages often were in strong
opposition The two men would not be pleased to see their names linked in this way since throughout most of their working
lives they detested each other Nevertheless they worked on the same problems and through their combined efforts created a
new discipline This new book by E L Lehmann himself a student of Neyman s explores the relationship between Neyman and
Fisher as well as their interactions with other influential statisticians and the statistical history they helped create together
Lehmann uses direct correspondence and original papers to recreate an historical account of the creation of the Neyman
Pearson Theory as well as Fisher s dissent and other important statistical theories
