(Japan),1900 **Artificial Intelligence in Real-Time Control 1992** M.G. Rodd,H.B. Verbruggen,2014-06-28 The symposium had two main aims to investigate the state of the art in the application of artificial intelligence techniques in real time control and to bring together control system specialists artificial intelligence specialists and end users Many professional engineers working in industry feel that the gap between theory and practice in applying control and systems theory is widening despite efforts to develop control algorithms Papers presented at the meeting ranged from the theoretical aspects to the practical applications of artificial intelligence in real time control Themes were the methodology of artificial intelligence techniques in control engineering the application of artificial intelligence techniques in different areas of control and hardware and software requirements This symposium showed that there exist alternative possibilities for control based on artificial intelligence techniques *Adaptive Systems in Control and Signal Processing 1992* L. Dugard,M. M'Saad,I.D. Landau,2014-06-28 Adaptive Systems remain a very interesting field of theoretical research extended by methodological studies and an increasing number of applications The plenary papers invited sessions and contributed sessions focused on many aspects of adaptive systems such as systems identification and modelling adaptive control of nonlinear systems and theoretical issues in adaptive control Also covered were methodological aspects and applications of adaptive control intelligent tuning and adaptive signal processing Robust Adaptive Control G.C. Goodwin,2014-05-23 The workshop brought together international experts in the field of robust adaptive control to present recent developments in the area These indicated that the theory of adaptive control is moving closer to applications and is beginning to give realistic guidelines useful in practical situations The proceedings also focused on the value of such practical features as filtering normalization deadzones and unification of robust control and adaptation *Analysis, Design, and Evaluation of Man-machine Systems, 1989* Baosheng Hu,1990 The twenty seven papers cover recent advances in both empirical and theoretical aspects of man machine interaction with special emphasis on the subjects of man automation and man computer interaction They provide information on a subject which has grown rapidly in importance during recent years *Computer Applications in Large Scale Power Systems ,1980* **Real Time Programming, 1980** V. H. Haase,1980 Published in Annual Review in Automatic Programming Vol 10 Includes a chapter on analysis description of automatic control systems **Dynamic Modelling and Control of National Economies, 1986** Béla Martos,Louis-François Pau,M. Ziermann,1987 This IFAC symposium considers the modelling analysis and control of various economic and socio economic systems The volume is divided into three sections covering economic theory macroeconomic policymaking national sectoral and regional models mathematical algorithmical and computational methods of modelling giving a clear and concise view of the use of computer systems in the world of economics **Artificial Intelligence in Real-time Control 1989** M. G. Rodd,Huatian Li,Hua-t'ien Li,Shi-Quan Su,1990 Papers presented at the workshop are representative of the state of the art of artificial intelligence in real time control The issues covered included the use of AI methods in the design implementation testing

maintenance and operation of real time control systems While the focus was on the fundamental aspects of the methodologies and technologies there were some applications papers which helped to put emerging theories into perspective The four main subjects were architectural issues knowledge acquisition and learning techniques and scheduling monitoring and management

Twelfth Conference on Innovative Applications of Artificial Intelligence American Association for Artificial Intelligence, 2000 AAI proceedings describe innovative concepts techniques perspectives and observations that present promising research directions in artificial intelligence The annual AAI National Conference provides a forum for information exchange and interaction among researchers from all disciplines of AI Contributions include theoretical experimental and empirical results Topics cover principles of cognition perception and action the design application and evaluation of AI algorithms and systems architectures and frameworks for classes of AI systems and analyses of tasks and domains in which intelligent systems perform Distributed for AAI Press
