The Supermanagers:

The Supermanagers Robert Heller, 1985 Ethicmentality - Ethics in Capitalist Economy, Business, and Society
Michela Betta, 2016-05-06 Ethicmentality is an innovative book. It blends ethics with mentality to capture the interdependence of ethical life and social life creatively. The book is also innovative because of the way this interdependence is explored. By focusing on practical ethical behavior in today's economy, business, and society, Michela Betta has advanced an understanding of ethics freed from the burden of moral theory. By introducing a new type of analysis, this book also contributes to methodological innovation. Familiar issues are revisited through the notion of ethicmentality. Capitalist economy is presented in terms of a mentality embedded in society, culture, and politics. Government is revealed as mentality about how to govern economically through market freedom rather than human rights. The rise of the financial economy is described as challenging the traditional capitalist mentality of equal opportunities. A money mentality around debts and owing is perceived as having replaced credit and owning, and the rise of corporation managers as having destroyed the old mentality of ownership. Ethicmentality shows the potential of constructive critique from economic, business, and society perspectives. It also breaches traditional limits by developing the idea of ethical capital and entrepreneurial ethics. Ethical thinking is infused with the Aristotelian notion of virtues and moderation to reflect about modern work. Ethicmentality helps us see the complexity of social and personal life. Given the pervasive nature of mentality and ethics, focus on individual deliberation, ethicmentality represents their productive combination, a new blend for ethical and social analysis.

Reform And Development In China: After 40 Years Wei Shan, Lijun Yang, 2019-03-08 This book provides a comprehensive review of China's experience in reform and opening up from political, social, and economic perspectives. It attempts to engage existing scholarly debates in three areas: first, how the party state has evolved in the past four decades and whether it remains a Leninist system or has departed from this system; second, how public attitudes, values, and behavior have been intertwined with institutional change and how the state is expanding its welfare coverage to enhance regime legitimacy; second, how China has attempted to explore new engines for its growth with consideration towards environmental protection and technological progress. Chapters in this book are selected from three years of conference presentations co-organized by the Institute of Public Policy (IPP) at the South China University of Technology and UNESCO. Since 2014, IPP and UNESCO have co-hosted a series of annual international conferences and invited leading scholars from China, Europe, and the US to discuss the major challenges to China and the world.

Medical Group Management, 1985 City Executives David N. Ammons, Charldean Newell, 1988-12-27 This study explores the work life of mayors, city managers, and other top executives in city government. Based on a survey of

527 city executives and enlivened with numerous anecdotes the book documents time allocation patterns and work routines City Executives makes comparisons with previous studies to show how city executives compare with managers in other types of organizations The authors also note how city managers role has changed over a 20 year period City executives are shown to be like their private sector counterparts For example they function at a relentless pace are frequently interrupted in their work and are generally overburdened However because city workers operate in an environment open to public scrutiny they are left with only a minority of their professional time to attend to matters that they describe as priorities Instead they must constantly respond to intergovernmental demands emergencies and the needs of citizens and legislative officials

Power and Neoclassical Economics A. Ozanne,2016-01-26 Mainstream economics almost completely ignores the role power plays in determining economic outcomes which means it can only provide partial explanations of the distribution of wealth and income and of the problems associated with inequality and poverty For many this is a fundamental failing that severely limits its relevance to the real world and is the source of much dissatisfaction with and cynicism about economics and economists Ozanne explains how this neglect of power has come about over the past 150 years and why it is important He reviews various definitions and theories of power from across the social sciences and proposes a new approach that could bring considerations of power back into standard economic theory and economics teaching The approach is simple and intuitive involving little more than re envisioning the social welfare function as a political economy function However if adopted in economics teaching it could radically change the way young economists are taught to think about economic problems and lead to a return to political economy

Marketing and Healthcare Organizations Colin Gilligan,Robin Lowe,2018-04-19 The need for a more conscious focused and proactive approach to the management of health care organizations has increased substantially One consequence of this is that health care managers are having to look at managerial approaches and techniques that previously were the province of the private sector Prominent among those is the whole area of marketing This work takes a broad approach to the marketing process highlighting some of the challenges that health care managers and medical professionals are having to face Having done this the authors move on to examine some of the characteristics of good and bad management practice It is against this background that in subsequent chapters they turn their attention to the question of marketing and how it might best contribute to the management of organizations throughout the health sector Each chapter includes questions and checklists offering scope for applying marketing principles to primary and secondary health care organizations of all types sizes and specialities
