Circular Economy Toolkit:

EcoDesign and Sustainability II Yusuke Kishita, Mitsutaka Matsumoto, Masato Inoue, Shinichi Fukushige, 2020-11-10

This book highlights cutting edge ecodesign research covering product and service design smart manufacturing and social perspectives in ecodesign Featuring selected papers presented at EcoDesign 2019 11th International Symposium on Environmentally Conscious Design and Inverse Manufacturing it also includes diverse interdisciplinary approaches to foster ecodesign research and activities In the context of Sustainable Development Goals SDGs it addresses the need for the manufacturing industry to design innovations for sustainable value creation taking into account technological developments legislation and consumer lifestyles Further the book discusses the concept of circular economy which originated in Europe and aims to increase resource efficiency by shifting away from the linear economy Focusing on product life cycle design and management smart manufacturing circular economy and business strategies and providing useful approaches and solutions to these emerging concepts this book is intended for both researchers and practitioners working in the broad field of ecodesign and sustainability

Sustainable Design and Manufacturing 2014 Part 1 R. Setchi, R.J. Howlett, M. Naim, H. Seinz, Indicators to monitor and evaluate the sustainability of bioeconomy Food and Agriculture Organization of the United Nations, 2019-11-06 FAO has been working for many years on non food biomass products including sustainable bioenergy and biotechnology and it received a mandate to coordinate international work on food first sustainable bioeconomy by 62 Ministers present at the Global Forum for Food and Agriculture GFFA 2015 Moreover FAO has received support from the Government of Germany to develop guidelines on sustainable bioeconomy development Phase 1 2016 Phase 2 2017 mid 2020 This involves work on the bioeconomy monitoring including the selection and use of indicators The ultimate aim of FAO s work on sustainability indicators is to provide technical assistance to countries and stakeholders in developing and monitoring sustainable bioeconomy more particularly on identifying suitable indicators in line with the Sustainable Bioeconomy Aspirational Principles and related Criteria agreed upon in 2016 by the International Sustainable Bioeconomy Working Group created in the context of FAO s project on Sustainable Bioeconomy Guidelines These indicators shall help both policy makers and producers manufacturers in monitoring and evaluating the sustainability of their bioeconomy strategies and interventions In order to cover all the relevant aspects and issues for a sustainable bioeconomy our approach identifies impact categories from the sustainable bioeconomy principles and criteria The monitoring approach suggested is balanced since it considers the three sustainability dimensions social economic and environmental at the same time it proposes to use a limited set of core indicators to keep the monitoring feasible and cost effective The suggested methodology starts with a review of existing monitoring approaches to identify already available indicators from which the authors

Proceedings of the 2nd International Conference on Innovative Materials, Manufacturing, and Advanced Technologies Lotfi Sai, Rabî Ben Sghaier, Krichen Abdelkader, Kacem Saï, Wassila Bouzid Saï, Med Amine Laribi, 2023-09-12 This book

presents select proceedings of the 2nd International Conference on Innovative Materials Manufacturing and Advanced Technologies IMMAT 2022 held in Sousse Tunisia on October 27-29 2022. The covered topics include theoretical, experimental and technological works and its application in various challenging domains like materials sciences, mechanical design, manufacturing environment and heat transfer. The volume provides an overview of innovations and technological advances in mechanical engineering. Given the selected and peer-reviewed papers, it will be a useful resource for practitioners working on cutting-edge topics in several areas related to the mechanics, such as mechanical behavior, material process interaction, fatigue behavior, tribological behavior of surfaces, manufacturing organization and optimization of production processes, additive manufacturing processes, renewable energy, design of lightweight components, robotics and industry 4.0. This book is intended to serve researchers, engineers and professionals working in the fields of material and mechanical engineering.

PLATE: Product Lifetimes And The Environment Conny A. Bakker, 2017-11-15. Product lifetimes are critical for the circular economy, resource efficiency, waste reduction and low carbon strategies for sustainability and are therefore of interest to academics from many different disciplines as well as original equipment manufacturers (OEMs) and other stakeholders. The challenges related to product lifetimes must be tackled from multiple perspectives, making the sharing of knowledge and expertise from different disciplines particularly important. This book presents papers from the second Product Lifetime and the Environment (PLATE) conference held in Delft, the Netherlands, in November 2017. The conference originated from the desire to bring together academic researchers working in the field of sustainability to benefit from each other's knowledge and further advance the field. The book includes the 88 full papers delivered at the conference, grouped according to the following 7 conference themes: design for product longevity, product lifetime optimization, cultural perspectives on the throwaway society, circular economy and product lifetimes, business opportunities, economic implications and marketing strategies, consumer influences on product lifetimes and policy regulation and legislation. The book will be of interest to all those concerned with sustainable consumption, circular economy and resource efficiency.

Strengthening the Environmental Dimensions of the Sustainable Development Goals in Asia and the Pacific Tool Compendium Asian Development Bank, United Nations, United Nations Environment Programme, 2019-01-01. The Asian Development Bank (ADB) in collaboration with the United Nations Environment Programme (UNEP) prepared this tool compendium to help address the issues, challenges and barriers faced by developing countries from Asia and the Pacific in the successful implementation of the environmental dimensions of the Sustainable Development Goals (SDGs). The tools presented here can help policy makers gain a better understanding of SDG interlinkages, establish horizontal and vertical policy coherence and select appropriate guidelines, indicators and institutional arrangements for effective integration into national policies, plans and programs. This publication reflects the high-level commitment of ADB and UNEP to support efforts to accelerate progress in implementing the environmental dimensions of the SDGs.
