**Ignorance and Imagination** Daniel Stoljar, 2006-05-25 It is an article of faith in contemporary analytic philosophy that the problem of consciousness is conceptual in origin that is that it arises because of unclarity in the concept of consciousness or related concepts and such a solution to the problem would involve a clarification of the relevant concepts Ignorance and Imagination argues that solutions of this kind are misguided because they all stem from a mistake view of the problem In particular the problem itself is not conceptual in origin but is epistemic that is it arises from our ignorance of some of the physical facts Stoljar argues once one has a clear view of the nature of the problem a solution to it

Research School of Social Sciences The Australian National University Daniel Stoljar Senior Fellow,2006-05-01 Ignorance  
and Imagination advances a novel way to resolve the central philosophical problem about the mind how it is that  
consciousness or experience fits into a larger naturalistic picture of the world The correct response to the problem Stoljar  
argues is not to posit a realm of experience distinct from the physical nor to deny the reality of phenomenal experience nor  
even to rethink our understanding of consciousness and the language we use to talk about it Instead we should view the  
problem itself as a consequence of our ignorance of the relevant physical facts Stoljar shows that this change of orientation is  
well motivated historically empirically and philosophically and that it has none of the side effects it is sometimes thought to  
have The result is a philosophical perspective on the mind that has a number of far reaching consequences for consciousness
