Vinyl and Related Polymers Calvin Everett Schildknecht, 1952 Polymers Bryan Ellis, Ray Smith, 2008-10-29 A reliable source for scientific and commercial information on over 1 000 polymers this revised and updated edition features 25 percent new material including 50 entirely new entries that reflect advances in such areas as conducting polymers hydrogels nano polymers and biomaterials The second edition also comes with unlimited access to a complete fully searchable web version of the reference Powerful retrieval software allows users to customize their searches and refine results Each entry includes trade names properties manufacturing processes commercial applications supplier details references and links to constituent monomers Organic Polymer Chemistry K. J. Saunders, 2013-03-09 This book deals with the organic chemistry of polymers which find technological use as adhesives fibres paints plastics and rubbers For the most part only polymers which are of commercial significance are considered and the primary aim of the book is to relate theoretical aspects to industrial practice The book is mainly intended for use by students in technical institutions and universities who are specializing in polymer science and by graduates who require an introduction to this field Several excellent books have recently appeared dealing with the physical chemistry of polymers but the organic chemistry of polymers has not received so much attention In recognition of this situation and because the two aspects of polymer chemistry are often taught separately this book deals specifically with organic chemistry and topics of physical chemistry have been omitted Also in this way the book has been kept to a reasonable size This is not to say that integration of the two areas of polymer science is undesirable on the contrary it is of the utmost importance that the inter relationship should be appreciated I wish to record my thanks to my colleagues with whom I have had many helpful discussions particularly Mrs S L Radchenko I also thank Miss E Friesen for obtaining many books and articles on my behalf and Mr H Harms for encouragement and assistance I am also grateful to Mrs M Stevens who skilfully prepared the manuscript Department of Chemical and Metallurgical Technology Ryerson Polytechnical Institute K J S **Encyclopedia of Polymer Science and Technology** Herman Francis Mark, 1964 Articles are signed and coverage is international presentation is North American Articles have been chosen to present a balanced account of all facets of polymer science and technology in five major groups 1 chemical substances 2 polymer properties 3 methods and processes 4 uses and 5 general background cf Introd Includes bibliographies v 15 includes a supplement v 16 is and index

Characterization and Failure Analysis of Plastics ASM International, Steve Lampman, 2003-01-01 The selection and application of engineered materials is an integrated process that requires an understanding of the interaction between materials properties manufacturing characteristics design considerations and the total life cycle of the product This reference book on engineering plastics provides practical and comprehensive coverage on how the performance of plastics is characterized during design property testing and failure analysis The fundamental structure and properties of plastics are reviewed for general reference and detailed articles describe the important design factors properties and failure mechanisms

of plastics The effects of composition processing and structure are detailed in articles on the physical chemical thermal and mechanical properties Other articles cover failure mechanisms such as crazing and fracture impact loading fatigue failure wear failures moisture related failure organic chemical related failure photolytic degradation and microbial degradation Characterization of plastics in failure analysis is described with additional articles on analysis of structure surface analysis and fractography High Polymers ,1956 **Plastic Products** ,1952 **Journal of Polymer Science** ,1960 *A Study of Polymer Solutions from Acrylic and Vinyl Latexes* Chi Shing Wong,1978 **Compounding Materials for the Polymer Industries** John S.
