## **Violent Environments Cb:**

*Rethinking Climate Change, Conflict and Security* Jan Selby, Clemens Hoffmann, 2017-10-02 Is global climate change likely to become a significant source of violent conflict and should it therefore be seen as a national security challenge Most Northern governments militaries think tanks and NGOs believe so as do many academic researchers on the grounds that increased temperatures changing precipitation patterns and rising sea levels will worsen existing social stresses especially within poor societies and marginal communities across Africa and Asia This book argues otherwise The first collection of its kind it brings together leading scholars of Anthropology Geography Development Studies and International Relations to provide a series of critical analyses of mainstream thinking on the climate security nexus It shows how policy discourse on climate conflict consistently misrepresents the causes of violence especially by obscuring its core political dimensions It demonstrates that quantitative research provides a flawed basis for understanding climate conflict linkages It argues that climate security discourse is in hoc with a range of questionable military authoritarian and developmental agendas And it reveals that the greening of global capitalism is already having violent consequences across the global South Climate change the book argues does indeed have serious conflict and security implications but these are quite different from how they are usually imagined This book was published as a special issue of *Geopolitics*

*The Politics of Possession* Thomas Sikor, Christian Lund, 2010-01-15 *The Politics of Possession* investigates how struggles over access to resources and political power constitute property and authority recursively Such dynamics are integral to state formation in societies characterized by normative and legal pluralism Includes some of the latest theoretical work on the dynamics of access and property and how they are joined to questions of power and authority Explores how access to resources is often contested and rife with conflict particularly in post colonial and post socialist countries Offers a thought provoking approach to the study of everyday processes of state formation Shows how the process of seeking authorization for property claims works to legitimize the authorizers and the efforts undertaken by politico legal institutions to gain legitimacy underpin and undermine various claims of access and property Contributors explore from a wide empirical compass of original research spanning Latin America Africa South East Asia and Eastern Europe
