Virtual Muse Experiments In Computer Poetry:

   Virtual Muse Charles O. Hartman,2012-01-01 In this engaging accessible memoir Charles Hartman shows how computer programming has helped him probe poetry s aesthetic possibilities He discusses the nature of poetry itself and his experiences with primitive computer generated poetry programs and illustrated with sample computer produced verses traces the development of more advanced hardware and software The central question about this cyber partnership Hartman says isn t exactly whether a poet or a computer writes the poem but what kinds of collaboration might be interesting He examines the effects of randomness arbitrariness and contingency on poetic composition concluding that the tidy dance among poet and text and reader creates a game of hesitation In this game a properly programmed computer has a chance to slip in some interesting moves   **Digital Poetics** Loss Pequeño Glazier,2002 In Digital Poetics Loss Glazier argues that the increase in computer technology and accessibility specifically the World Wide Web has created a new and viable place for the writing and dissemination of poetry Glazier s work not only introduces the reader to the current state of electronic writing but also outlines the historical and technical contexts out of which electronic poetry has emerged and demonstrates some of the possibilities of the new medium Glazier examines three principal forms of electronic textuality hypertext visual kinetic text and works in programmable media He considers avantgarde poetics and its relationship to the on line age the relationship between web pages and book technology and the way in which certain kinds of web constructions are in and of themselves a type of writing With convincing alacrity Glazier argues that the materiality of electronic writing has changed the idea of writing itself He concludes that electronic space is the true home of poetry and in the 20th century has become the ultimate space of poesis Digital Poetics will attract a readership of scholars and students interested in contemporary creative writing and the po   *Electronic Literature* Scott Rettberg,2018-12-14 Electronic Literature considers new forms and genres of writing that exploit the capabilities of computers and networks literature that would not be possible without the contemporary digital context In this book Rettberg places the most significant genres of electronic literature in historical technological and cultural contexts These include combinatory poetics hypertext fiction interactive fiction and other game based digital literary work kinetic and interactive poetry and networked writing based on our collective experience of the Internet He argues that electronic literature demands to be read both through the lens of experimental literary practices dating back to the early twentieth century and through the specificities of the technology and software used to produce the work Considering electronic literature as a subject in totality this book provides a vital introduction to a dynamic field that both reacts to avant garde literary and art traditions and generates new forms of narrative and poetic work particular to the twenty first century It is essential reading for students and researchers in disciplines including literary studies media and communications art and creative writing   *The Complete Stein Poems, 1998-2003* Jackson Mac Low,2025-08-19 A landmark publication in computer generated poetry drawn from the works of Gertrude Stein The Stein poems of Jackson Mac

Low 1922 2004 were written between 1998 and 2003 Comprising more than 500 pages of text this edited series of 161 poems most of them never published is the poet s last great work composed during the final years of a lifetime of prolific creation The raw material of each poem was produced through Mac Low s diastic text selection method of reading through passages of either Ulla E Dydo s A Stein Reader or a corrected version of Gertrude Stein s Tender Buttons Guided by Charles O Hartman s 1994 DIASTEX5 computer program which replicates the diastic method first developed by Mac Low in 1963 the process requires that words be drawn sequentially from the source text in accordance with their rule driven algorithmic correspondence with a seed text Taken as a whole these poems are a breathtaking invitation to the reader into a space of creative possibilities and unforeseen encounters *The Bloomsbury Handbook of Electronic Literature* Joseph Tabbi,2017-11-30 Winner of the 2017 N Katherine Hayles Award for Criticism of Electronic Literature A CHOICE Outstanding Academic Title 2018 The digital age has had a profound impact on literary culture with new technologies opening up opportunities for new forms of literary art from hyperfiction to multi media poetry and narrative driven games Bringing together leading scholars and artists from across the world The Bloomsbury Handbook of Electronic Literature is the first authoritative reference handbook to the field Crossing disciplinary boundaries this book explores the foundational theories of the field contemporary artistic practices debates and controversies surrounding such key concepts as canonicity world systems narrative and the digital humanities and historical developments and new media contexts of contemporary electronic literature Including guides to major publications in the field The Bloomsbury Handbook of Electronic Literature is an essential resource for scholars of contemporary culture in the digital era **Impractical Python Projects** Lee Vaughan,2018-11-27 Impractical Python Projects is a collection of fun and educational projects designed to entertain programmers while enhancing their Python skills It picks up where the complete beginner books leave off expanding on existing concepts and introducing new tools that you ll use every day And to keep things interesting each project includes a zany twist featuring historical incidents pop culture references and literary allusions You ll flex your problem solving skills and employ Python s many useful libraries to do things like Help James Bond crack a high tech safe with a hill climbing algorithm Write haiku poems using Markov Chain Analysis Use genetic algorithms to breed a race of gigantic rats Crack the world s most successful military cipher using cryptanalysis Derive the anagram I am Lord Voldemort using linguistical sieves Plan your parents secure retirement with Monte Carlo simulation Save the sorceress Zatanna from a stabby death using palingrams Model the Milky Way and calculate our odds of detecting alien civilizations Help the world s smartest woman win the Monty Hall problem argument Reveal Jupiter s Great Red Spot using optical stacking Save the head of Mary Queen of Scots with steganography Foil corporate security with invisible electronic ink Simulate volcanoes map Mars and more all while gaining valuable experience using free modules like Tkinter matplotlib Cprofile Pylint Pygame Pillow and Python Docx Whether you re looking to pick up some new Python skills or just need a pick me up you ll find endless educational geeky fun

with Impractical Python Projects   Prehistoric Digital Poetry Christopher Thompson Funkhouser,2007-06-24 Explores pioneering works of digital poetry and demonstrates how technological constraints that would seemingly limit the aesthetics of poetry have instead extended and enriched poetic discourse For the last five decades poets have had a vibrant relationship with computers and digital technology This book is a documentary study and analytic history of digital poetry that highlights its major practitioners and the ways that they have used technology to foster a new aesthetic Focusing primarily on programs and experiments produced before the emergence of the World Wide Web in the mid 1990s C T Funkhouser analyzes numerous landmark works of digital poetry to illustrate that the foundations of today s most advanced works are rooted in the rudimentary generative visual and interlinked productions of the genre s prehistoric period Since 1959 computers have been used to produce several types of poetic output including randomly generated writings graphical works static animated and video formats and hypertext and hypermedia Funkhouser demonstrates how hardware programming and software have been used to compose a range of new digital poetic forms Several dozen historical examples drawn from all of the predominant approaches to digital poetry are discussed highlighting the transformational and multi faceted aspects of poetic composition now available to authors This account includes many works in English and other languages which have never before been presented in an English language publication In exploring pioneering works of digital poetry Funkhouser demonstrates how technological constraints that would seemingly limit the aesthetics of poetry have instead extended and enriched poetic discourse As a history of early digital poetry and a record of an era that has passed this study aspires both to influence poets working today and to highlight what the future of digital poetry may hold   Aesthetics of digital poetry Friedrich W.
