Oats, 2021-07-20 An Illustrated Guide to Furniture History provides upper level students and instructors with an alternative visual analytical approach to learning about furniture history from Antiquity to Postmodernism Following an immersive teaching model it presents a Nine Step Methodology to help students strengthen their visual literacy and quickly acquire subject area knowledge Moving chronologically through key periods in furniture history and interior design such as the Renaissance the Arts and Crafts Movement and Modernism it traverses Europe to America to present a comprehensive foundational guide to

the history of furniture design Part I addresses furniture within the context of the built environment with chapters exploring the historical perspective construction principles and the categorization of furniture In Part II the author visually depicts the structural organization of the methodological process a three category framework History Aesthetics and Visual Notes The chapters in this part prepare the reader for the visual analysis that will occur in the final section of the book The book is lavishly illustrated in full color with over 300 images to reinforce visual learning and notation A must have reference and study guide for students in industrial and product design interior design and architecture *Drawn to Design* Eric Jenkins,2022-04-19 The book is a guide for students and teachers to understand the need for the role of and the methods and techniques of freehand analytical sketching in architecture The presentation focuses on drawing as an approach to and phase of architectural design The conceptual goal of this approach is to use drawing not as illustration or depiction but as exploration The first part of the book discusses underlying concepts of freehand sketching in design education and practice as a complement to digital technologies The main component is a series of chapters that constitute a typology of fundamental issues in architecture and urban design for instance issues of facade are illustrated with sketch diagrams that show how facades can be explored and sketched through a series of specific questions and step by step procedures In the expanded and updated edition a new part explores the questions and experiences of large architectural offices in applying freehand drawing in the practice of architectural design This book is especially timely in an age in which the false conflict between traditional vs digital gives way to multiple design tools including sketching It fosters understanding of the essential human ability to investigate the designed and the natural world through freehand drawing **Design Graphics** ,2006 This unique book emphasizes hand drawing as a design skill demonstrating this drawing as a mental as well as a physical exercise Utilizing this book will enable the practitioner to make design decision on paper faster and easier and will let them know how visual communication with clients can provide better more economical design solutions Practical straightforward and reader friendly this book covers such topics as sketching line light texture and materials design drawing including the 5 step bubble flow and conceptual doodles diagrams and perspective and rendering techniques including 1pt and 2pt eyeball methods overlay method and entourage An excellent refresher for professional designers and architects as well as a primer for those employed in any related field **Multisensory Landscape Design** Daniel Roehr,2022-05-03 The interaction of our bodies in space is intrinsically linked to the ways in which we design In spatial design we tend to focus on solely the visual often treating it as the dominant sense while ignoring the other four senses touch sound smell taste While research has been carried out on the perception of multisensorial experiences and design in the last two decades there is no combined resource on how to address multisensory design in landscape architecture urban and environmental design This is a textbook for design students professionals and educators to develop multisensorial literacy This book is the first of its kind providing introductions on each of the five senses along with exercises that demonstrate how to observe record and visualize

them It explores current design school pedagogy and how we might imagine a more mindful way of teaching The book is a foundational resource for students professionals and instructors to understand and ultimately create multisensorial spaces that are inclusive for all This book imagines a world where seeing is redefined in a way that encompasses all of the senses not just the visual

Experiential Visualization in Architectural Design Media Vincent B. Canizaro,2023-10-30 Experimental Visualization in Architectural Design Media How It Actually Works is a theoretical practical and interdisciplinary account of the tools used by architects and designers The book focuses on the how these tools influence their ability to envision and craft the future experiential reality of buildings and environments The book is structured around two parallel sets of questions The first concerns the effects of various media on the designer s understanding of their work in experiential terms The media considered include the process of design build standard media such as scale model building hand drawing drafting and extends into the now dominant digitally based design media of BIM digital modeling and emerging VR technologies such as Enscape The second line of questioning seeks patterns of use and other attributes designers deploy in practice to achieve an experiential and meaningful understanding of their work with and through each medium To answer these questions the author provides a detailed assessment of the pros and cons affordance and constraint of each form of mediation and a set of recommendations documenting how experienced designers enhance their visualization skills to support such experiential design This work is interwoven with interdisciplinary consideration of technology perception media studies history and bolstered by the direct experiences of design professionals This book will be of interest to researchers working in the field of architecture and design as well as practising architects designers and students who are seeking guidance on how to effectively design and consider the experience of their future built environments
