The Visual Turn and the Transformation of the Textbook James A. LaSpina,2014-04-04 A study and analysis of how the computer is transforming the textbook and our modes of literacy from print based to visual forms **Imagination and Play in the Electronic Age** Dorothy G Singer,Jerome L Singer,2009-06-30 Television video games and computers are easily accessible to twenty first century children but what impact do they have on creativity and imagination In this book two wise and long admired observers of children s make believe look at the cognitive and moral potential and concern created by electronic media The SAGE Handbook of Communication and Instruction Deanna L. Fassett,John T. Warren,2010-03-18 The SAGE Handbook of Communication and Instruction functions as a comprehensive resource for scholars graduate students and general readers interested in the intersections of communication and instruction irrespective of paradigm method or disciplinary background Each chapter selection in the Handbook roots contemporary work in disciplinary foundations and identifies avenues for future inquiry Features Benefits Compiles original research and reviews of research in the intersections of communication and instruction from key figures in the disciplines not only helping readers see present and future trajectories in this area of inquiry in foundational lines of research but also providing a sense of how this area has grown along a series of different theoretical and methodological approaches Helps readers identify avenues for research in consultation with both key figures and innovators in this area of inquiry Serves as the primary contemporary and multi paradigmatic guide to the study of the intersections of communication and instruction recognizing all paradigmatic approaches and methods as meaningful The Handbook will not only strengthen readers interest in and comfort with different paradigmatic approaches to communication and instruction but also make possible a generation of well rounded comprehensive and effective researchers capable of reading a broad array of work from a variety of approaches

Globalisation and Historiography of National Leaders Joseph Zajda,Tatyana Tsyrlina-Spady,Michael Lovorn,2016-12-23 Globalisation and Historiography of National Leaders Symbolic Representations in School Textbooks the 18th book in the 24 volume book series Globalisation Comparative Education and Policy Research explores the interrelationship between ideology national identity national history and historical heroes setting it in a global context Based on this focus the chapters represent hand picked scholarly research on major discourses in the field of history textbooks and symbolic representations of national heroes and draw upon recent studies in the areas of globalisation history textbooks and national leaders A number of researchers have written on the importance of teaching national history in order to foster national identity and a sense of belonging to a certain society state and people among the younger generation Some nations prefer to create national heroes out of their political leaders who are still in power and whose lives and reputation are portrayed as being eminently spotless Using diverse comparative education paradigms from critical theory social semiotics and historical comparative research the authors analyse the unpacking of the ideological agenda hidden behind the choice and lionization or silencing of the

preferred national heroes They provide an informed critique of various historical narratives depicting national leaders and national heroes The book provides an easily accessible practical yet scholarly source of information on international concerns in the field of globalisation history education and policy research Offering an essential sourcebook of ideas for researchers history educators practitioners and policymakers in the fields of globalisation and history education it also provides a timely overview of current changes in politically correct history education narratives in history textbooks The 'Hidden Curriculum' of Vietnam's English School Textbooks Thi Duyen Phuong,Raf Vanderstraeten,2024-03-15 This book analyzes the basic ideas and premises underlying the English textbooks used at the higher secondary school level in Vietnam from the 1980s to the present from a sociological perspective The dataset upon which this book builds consists of a collection of 18 textbooks which belong to five sets of locally developed English textbooks for grade 10 to grade 12 students These series were used in all public schools from the mid 1980s to the present During this period schooling expanded rapidly in Vietnam while English also gained increasing prominence within the school system This book examines the curricular content of these textbooks and presents a long term analysis of the hidden curricular content in light of Vietnam s recent history and its government s concerns about national identity **Negotiating Spaces for Literacy Learning** Mary Hamilton,Rachel Heydon,Kathryn Hibbert,Roz Stooke,2015-05-21 Negotiating Spaces for Literacy Learning addresses two paradoxical currents that are sweeping through the contemporary educational field The first is the opening up of possibilities for multimodal communication as a result of developments in digital technologies and the sensitivity to multiliteracies The second is the increasing pressure from standardised testing accountability and performance measurement which pull curricular and pedagogical practices out of alignment with the everyday informal practices and interests of teachers and learners and narrow opportunities for diverse expressions of literacy Bringing together an international team of scholars to examine the tensions and struggles that result from the current educational climate the book provides a much needed discussion of the intersection of technologies of literacies education and self It does so through diverse approaches including philosophical theoretical and methodological treatments of multimodality and governmentality and a range of literacies early years primary school workplace digital middle school secondary school indigenous adult and place With examples taken from all stages of education and in several countries the book allows readers to explore a range of multimodal practices and the ways in which governmentality plays out across them **Telling Pieces** Peggy Albers,Sharon Murphy,1999-12 Uses the case of a 6th grade classrm in a small US town to systematically consider how pre adolescent middle school children develop a knowledge understanding of the conventions of art how they use this knowledge to create artful representations

Forthcoming Books Rose Arny,2001-06 *Journal for Research in Mathematics Education* ,2015 **The Oxford Handbook of Film and Media Studies** Robert Kolker,2008-09-11 This handbook examines film and new media in the light of their convergence It draws on leading scholars in the field to discuss traditional areas of history and theory of film and

digital media Its focus however is on the cycle of technologically driven arts Film was born of a number of experiments in reproducing motion all of which culminated in the nineteenth century projection of short films The creation of digital media resulted from experiments in alternative forms of representation in the early 1960s John Whitney began creating avant garde films from digital graphics around 1960 and some of his ideas and methods were incorporated by Stanley Kubrick in 2001 A Space Odyssey By the early 1990s commercial filmmakers began to employ digital effects in their work By the late nineties digital arts had come fully into their own both in the form of stand alone or interactive artworks and films created with and for the computer At the same time digital effects had completely overtaken optical printing and matte painting in film From special effects to creating realistic backgrounds and crowds the digital is infiltrating all aspects of filmmaking The infiltration is about to become a takeover as celluloid is replaced by high definition digital recording and projection processes Many aspects of film will change as this latest convergence takes place Already cultural response to film has changed as viewers begin to teach themselves about film through supplementary material on DVDs and to make their own films on home computers But this handbook is not a technical history or manual Quite the contrary it is a scholarly work discussing the aesthetics economics and cultural results of these changes and convergences The book balances traditional scholarship and analysis with essays addressing technological change and the concurrent changes in cultural responses to these changes responses already acknowledged by the profession **Choice** ,1999 **Book Review Index** ,2003 Vols 8 10 of the 1965 1984 master cumulation constitute a title index **The Best Books for Academic Libraries: Political science, law, education** ,2002 Books recommended for undergraduate and college libraries listed by Library of Congress Classification Numbers American Book Publishing Record ,2003 **Multimodal Literacies and Emerging Genres** Tracey Bowen,Carl Whithaus,2013-04-09 A student s avatar navigates a virtual world and communicates the desires emotions and fears of its creator Yet how can her writing instructor interpret this form of meaningmaking Today multiple modes of communication and information technology are challenging pedagogies in composition and across the disciplines Writing instructors grapple with incorporating new forms into their curriculums and relating them to established literary practices Administrators confront the application of new technologies to the restructuring of courses and the classroom itself Multimodal Literacies and Emerging Genres examines the possibilities challenges and realities of mutimodal composition as an effective means of communication The chapters view the ways that writing instructors and their students are exploring the spaces where communication occurs while also asking what else is possible The genres of film audio photography graphics speeches storyboards PowerPoint presentations virtual environments written works and others are investigated to discern both their capabilities and limitations The contributors highlight the responsibility of instructors to guide students in the consideration of their audience and ethical responsibility while also maintaining the ability to speak well Additionally they focus on the need for programmatic changes and a shift in institutional philosophy to close a possible digital divide and

remain relevant in digital and global economies Embracing and advancing multimodal communication is essential to both higher education and students The contributors therefore call for the examination of how writing programs faculty and administrators are responding to change and how the many purposes writing serves can effectively converge within composition curricula Curriculum Books William Henry Schubert,2002 A substantial revision of Curriculum Books The First Eighty Years this new volume is a comprehensive presentation of curriculum books that have contributed to theoretical and practical discourse about curriculum throughout the twentieth century Following an introduction that explains the book s purpose and how it was constructed the authors present each decade in a chapter that provides contextual reminders about the social political and cultural events of the time period discussion of salient events in curriculum discourse and a comprehensive bibliography by year of curriculum books More than 3 000 curriculum books are weaved into this presentation The original and updated conclusions are offered to provide interpretative perspective on curricular trends state of the field and possibilities for the future of curriculum studies Publisher description **The Best in Children's Nonfiction** Myra Zarnowski,Richard M.
