

The Dynamics of Interdependence in Organizations

Dean Tjosvold¹

Simon Fraser University

A model is developed that stipulates that task, roles, and reward distribution of organizational structure, perceived goal interdependence, patterns of behavior, and corporate values and interpersonal attitudes form causal loops, and mutually reinforce and sustain each other. Positive and negative goal interdependencies and independence have been identified and result in much different dynamics and outcomes. Studies overall indicate that positive interdependence promotes coordination and productivity. Research is needed to determine generalizability of these findings and to identify the purposes and situations when negative interdependence and independence are appropriate.

INTRODUCTION

Interdependence pervades organizations and is fundamental to understanding them. Individuals within a work group, work groups within departments, and departments within organizations all depend upon each other. Even persons who work independently at their own job typically require others to provide information and supplies to complete their work. Research, production, and marketing departments need to share their expertise and knowledge to develop successful new products. Each organization in turn depends on a host of other people and organizations (Pfeffer & Salancik, 1978). Theorists have proposed that interdependence and subsequent interaction among individuals and groups are the bases for organizations (Allport, 1962; Barnard, 1948; Weick, 1979).

The Dynamics Of Interdependence:

The Dynamics of Interdependence Andrew M. Scott, 2018-06-15 Scott makes an informed case for a global perspective on world politics and a compelling plea for policies that will improve chances for human survival. Because important evolutionary processes particularly interdependence and technological advance shape the global system he argues that concepts used to study these processes must also have an evolutionary component. Without that we will not be able to understand or manage our highly interactive world. Originally published in 1982. A UNC Press Enduring Edition. UNC Press Enduring Editions use the latest in digital technology to make available again books from our distinguished backlist that were previously out of print. These editions are published unaltered from the original and are presented in affordable paperback formats bringing readers both historical and cultural value.

Asia-Gulf Economic Relations in the 21st Century Tim Niblock, 2013-12-31 Asia constitutes the hub of the transformation of global economic power today. The Gulf itself part of Asia is of increasing importance in this transformation. This book documents the growing interactions between the economies of the Gulf states and those of the rest of Asia. These relationships are critical to how the world economy develops over the next decade and how economic and perhaps strategic power is distributed. This volume assembles cutting edge thinking by 16 specialists on a wide variety of topics covering Arab Gulf relations with China Japan ASEAN Korea and India as well as with Russia Iran and Turkey.
