Translation and Decolonisation Claire Chambers,Ipek Demir,2024-05-31 *Translation and Decolonisation Interdisciplinary Approaches* offers compelling explorations of the pivotal role that translation plays in the complex and necessarily incomplete process of decolonisation In a world where translation has historically been a tool of empire and colonisation this collection shines the spotlight on the potential for translation to be a driving force in decolonial resistance The book bridges the divide between translation studies and the decolonial turn in the social sciences and humanities revealing the ways in which translation can challenge colonial imaginaries institutions and practice and how translation opens up South to South conversations It brings together scholars from diverse disciplines and fields including sociology literature languages migration politics anthropology and more offering interdisciplinary approaches and perspectives By examining both the theoretical and practical aspects of this intersection the chapters of this agenda setting collection explore the impact of translation on decolonisation and highlight the need to decolonise translation studies itself The book illuminates the transformative power of translation in transcending linguistic cultural and political boundaries *Translation and Tourism* M. Zain Sulaiman,Rita Wilson,2019-03-05 This book addresses one of the most central yet criticised solutions for international tourism promotion namely translation It brings together theory and practice explores the various challenges involved in translating tourism promotional materials TPMs and puts forward a sustainable solution capable of achieving maximum impact in the industry and society The solution in the form of a Cultural Conceptual Translation CCT model identifies effective translation strategies and offers a platform for making TPM translation more streamlined efficient and easily communicated Using the English Malay language combination as a case study the book analyses tourism discourse and includes a road test of the CCT model on actual end users of TPMs as well as tourism marketers in the industry Guidelines for best practices in the industry round out the book which offers valuable insights not only for researchers but also and more importantly various stakeholders in the translation tourism and advertising industries *Decolonizing the Stage* Christopher B. Balme,1999 A study of post colonial drama and theatre It examines how dramatists from various societies have attempted to fuse the performance idioms of their traditions with the Western dramatic form demonstrating how the dynamics of syncretic theatrical texts function in performance *India in Translation, Translation in India* GJV Prasad,2021-10-15 *India in Translation* Translation in India seeks to explore the contours of translation of and in India how Indian texts travel around the world in translation how Indian texts travel across languages in the subcontinent and how texts from various languages of the world travel to India The book poses pertinent questions like What influences the choice of texts and the translations both within and outside India Are there different ideas of India produced through these translations What changes have occurred over the last two hundred odd years from the time of colonialism and anti colonial struggle to that of globalisation

How does one rate the success or otherwise of a translation? What is the role of these translations in their host languages in their cultural and literary polysystems? The book includes eighteen essays from eminent academics and researchers who examine the numerous facets of the rich and varied translation activity. It shows how borders both national and subnational and generic are created, how they are reinforced, and how they are crossed. While looking at the theory, methodology, and language of translation, the essays also enunciate the role of translations in political, social, and cultural movements.

Less Translated Languages Albert Branchadell, Lovell Margaret West, 2005. This is the first collection of articles devoted entirely to less translated languages, a term that brings together well-known, widely used languages such as Arabic or Chinese and long-neglected minority languages with power as the key word at play. It starts with some views on English, the dominant language in Translation, as elsewhere considers the role of translation for minority languages, both a source of inequality and a means to overcome it. It takes a look at translation from less translated major languages and cultures and ends up with a closer look at translation into Catalan, a paradigmatic case of less translated language. In a final section that includes a vindication of six prominent Catalan translators, combining sound theoretical insight and accurate analysis of relevant case studies, the contributors to this collection make a convincing case for a more thorough examination of less translated languages within the field of Translation Studies.
