Disentangling André Jansson,Paul C. Adams,2021 Digital networking platforms like Facebook and Twitter have revolutionized everyday human interaction by facilitating the search for and access to information entertainment and social connection But with the rise of digital surveillance and data extraction for profit more people are seeking not just to disconnect from technology but to fully disentangle themselves from the widespread social economic and political networks of digital communications Disentangling offers an interdisciplinary global analysis of this growing trend toward disconnection Moving beyond technological disconnection this volume proposes the term disentangling as a lens for re thinking the structures of our digital world and categorizing the ways in which people reject avoid or rework their digital networks Across twelve chapters contributors explore the existential issues stemming from digitally entangled lives including cultural capital and digital detox retreats and investigate how geographies of disconnection relate to wider societal challenges Additional chapters explore connections between digital disconnection and other forms of disconnection including death sleep and the abandonment of human settlements The volume closes with a reflection on connectivity in the post pandemic society and how we might rework our connections to fit a socially distanced world Blending philosophy and sociology with media geography Disentangling offers a crucial reflection on how we might unravel our digital dependence by reasserting resilient boundaries between ourselves and the surrounding political economic cultural and technological systems

Racial Virtuality Danielle Wong,2026-04-07 Reveals how Asianness emerges as a dynamic media materiality shaped by measurement circulation and calibration amid shifting labor relations under contemporary capitalism Racial Virtuality contends that racialization not only occurs through representation in media but also through our very interactions with media technologies and their unseen operations The racialization of Asians who appeared to embody the model minority success story in the first decade of social media is now implicated more in the racial logics of algorithms interfaces gestures circulations and affects rather than individual representations of Asianness Racial Virtuality intervenes in existing new media discourses to approach race as virtual relation following a rich methodology of Asian American materialist critique to investigate gendered racial form and mediated life Danielle Wong theorizes racial virtuality as the suggestive materiality of non representational new media processes and argues that these non figurative images affects textures sounds and gestures constitute racializing calibrations within the context of information capitalism Extending the archive of Asianness into

everyday interactions with the virtual such as Instagram skincare stories memes of sleeping Asians and algorithmic choreography on TikTok Wong considers race as a capacity for labor and capital and argues that Asianness is a specific racial form of informational capital and a mode of relational critique She reveals the ways in which Asianness moves beyond a politics of recuperation and recognition to yield modes of fugitivity illicit knowledge and resistance all of which threaten existing relationships between capital labor and information that govern human capital By putting memes social media apps and digital platforms in conversation with more traditional cultural productions like film literature and theatre Racial Virtuality broadens our understanding of racialization in the digital age and challenges traditional notions of cultural production and subject formation In doing so it demonstrates how Asianness circulates as a new media form in a digital marketplace of commodified affects senses gestures and tastes
