Trouble With Science:

The Problem with Science R. Barker Bausell,2021 Recent events have vividly underscored the societal importance of science yet the majority of the public are unaware that a large proportion of published scientific results are simply wrong The Problem with Science explains in nontechnical language how such fallacy occurs how it gets published in respected scientific journals and how it can largely be avoided

The Trouble with Science Robin Dunbar,1995 Examining the widespread sense of the difficulty of science this work considers why many people find it so hard to grasp how science works why there is so much suspicion of its success and why many still seek refuge in religion or New Age spirituality The author draws on anthropological and psychological material as well as physics astronomy and chemistry and provides a wealth of detail and scientific information

Trouble with Science Ian Graham,Kathryn Senior,Brian Williams,David Salariya,2012-08-01 An innovative informative and amusing introduction to scientific and technological subjects featuring fascinating and bizarre facts supported by simple explanations and diagrams

The Trouble with Science Robin Dunbar,2011-04-07 The trouble with science began in 1632 when Galileo demolished the belief that the earth is the centre of the universe Yet despite the bewildering success of the scientific revolution many continue to hanker after the cosy certainties of a man centred universe and young people increasingly turn away from science In The Trouble with Science Professor Robin Dunbar launches a vigorous counter blast Drawing on studies of traditional societies and animal behaviour his argument ranges from Charles Darwin to Nigerian Fulani herdsman from lab rats to the mathematicians of ancient Babylonia Along the way he asks whether science really is unique to western culture even to mankind and suggests that our trouble with science may lie in the fact that evolution has left our minds better able to cope with day to day social interaction than with the complexities of the external world
