Harmeyer,2019-09-15 John Calvin Allen professionally known as J C worked as a photographer for Purdue University from  
1909 1952 and operated his own photography business until his death in 1976 The J C Allen photographs represent a  
historical account of the transition from pioneer practices to scientific methodologies in agriculture and rural communities  
During this major transitional period for agriculture tractors replaced horses hybrid corn supplanted open pollinated corn  
and soybeans changed from a novelty crop to regular rotation on most farms During this time purebred animals with better  
genetic pedigrees replaced run of the mill livestock and systematic disease prevention in cattle swine and poultry took place  
Allen s photographs also document clothing styles home furnishings and the items people thought important as they went  
about their daily lives Looking closely at tractors livestock wagons planters sprayers harvesting equipment and crops gives  
one a sense of the changing and fast paced world of agriculture at that time This volume contains over 900 picturesque  
images most never before seen of men women and children working on the farm which remain powerful reminders of life in  
rural America at the turn of the twentieth century As old farmhouses and barns fall victim to age Allen photographs are all  
that remain While those people and times no longer exist today they do remain alive because of the preservation of that  
history on film A camera in his hands and an eye for photography allowed Allen to create indelible visual histories that  
continue to tell the story of agriculture and rural life from long ago    **Happy Days in Happy, Texas** Dr. Rickey L.
