The Integration Of Human Values:

The Integration of Human Values Cornelius J. Van der Poel, 1969-09-01 *The Construction of Value Philosophy in Contemporary China* Deshun Li, 2025-03-11 This book approaches humanism in the new era in China by discussing the nature of value philosophy and by analyzing in depth the significance of value research for China's modernization and future development. The author expounds his own point of view on the value of human beings as the foundation of value philosophy and subsequently applies it to understanding conflicting values between China and the West, universal values, etc. In addition, he discusses the cultural value concept in China, e.g., the craze for traditional Chinese culture, value choices in socialism with Chinese characteristics, and Deng Xiaoping's great practice. Combining the fields of academic study, political affairs, cultural communication, and social life, the book offers a valuable resource for scholars, researchers, politicians, diplomats, university students, and those who want to study and understand value philosophy, Chinese value research, and Chinese culture. In addition, it seeks to realize the value of human beings in culture. Lastly, its discussions on the value concept can facilitate understanding and respect among people's all over the world.

Society's Choices Committee on the Social and Ethical Impacts of Developments in Biomedicine, Institute of Medicine, 1995-03-13 Breakthroughs in biomedicine often lead to new life-giving treatments but may also raise troubling even life and death quandaries. *Society's Choices* discusses ways for people to handle today's bioethics issues in the context of America's unique history and culture and from the perspectives of various interest groups. The book explores how Americans have grappled with specific aspects of bioethics through commission deliberations, programs by organizations, and other mechanisms and identifies criteria for evaluating the outcomes of these efforts. The committee offers recommendations on the role of government and professional societies, the function of commissions and institutional review boards, and bioethics in health professional education and research. The volume includes a series of 12 superb background papers on public moral discourse, mechanisms for handling social and ethical dilemmas, and other specific areas of controversy by well-known experts: Ronald Bayer, Martin Benjamin, Dan W. Brock, Baruch A. Brody, H. Alta Charo, Lawrence Gostin, Bradford H. Gray, Kathi E. Hanna, Elizabeth Heitman, Thomas Nagel, Steven Shapin, and Charles M. Swezey.
