

What Is Engineering?

Engineering is a broad term for the process of using scientific and mathematical principles to solve problems. There are generally considered to be five main types of engineering: civil, mechanical, electrical, chemical and industrial. Each of these groups has a wide range of engineering jobs within them.

What Do Engineers Do?

There are lots of types of engineering, meaning that engineers can do a range of things as part of their jobs, such as:

- designing and building new road layouts to ease congestion
- creating new products using more environmentally friendly materials and processes
- testing networks of computer systems to see their working efficiency
- developing new life-saving medicines or technologies

What Skills Do Engineers Have?

Engineers tend to need the following skills:

- problem solving
- critical thinking
- teamwork
- communication
- time management
- research
- mathematical and scientific understanding
- creativity

Engineering

From the road networks, design of bridges, electricity and gas, to being a civil engineer

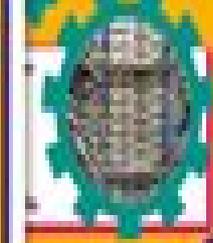

Electrical Engineering

Designing and testing electrical systems such as engines, power plants or building systems

Mechanical Engineering

Designing and manufacturing mechanical systems or machines
