## **Work Studies:**

**Critical Social Work Studies in South Africa** Annaline Keet, Nevashnee Perumal, Veonna Goliath, 2022-11-18 *Critical Social Work Studies in South Africa Prospects and Challenges* is a convergence of 18 critical Black African minds from various South African universities who challenge the hegemonic status quo in society. In this collection of conceptual and empirical papers, each author tells a compelling story with common themes that are firmly rooted in advancing decolonial knowledge. This book covers pertinent issues in social work practice and education, ranging from rethinking parenting roles, utopian notions of family mediation practice in relation to unmarried fathers to race and landlessness. The book contains practical suggestions in respect of decolonising the self as well as social work curricula in higher education. In addition, *Critical Social Work Studies in South Africa Prospects and Challenges* delves into trusting relationships as cornerstones to effective supervision, centring African spirituality in social work, economic emancipation of Black women, cultural trauma, as well as drug abuse prevention. Based on the range of themes, this book would benefit social work practitioners, students, academics, social activists, and anyone who is curious to understand how decoloniality may be operationalised in social work.

**Mission Studies**, 1899 *International Handbook of Research in Professional and Practice-based Learning* Stephen Billett, Christian Harteis, Hans Gruber, 2014-07-15 *The International Handbook of Research in Professional and Practice based Learning* discusses what constitutes professionalism, examines the concepts and practices of professional and practice based learning, including associated research traditions and educational provisions. It also explores professional learning in institutions of higher and vocational education, as well as the practice settings where professionals work and learn, focusing on both initial and ongoing development and how that learning is assessed. The Handbook features research from expert contributors in education, studies of the professions, and accounts of research methodologies from a range of informing disciplines. It is organized in two parts. The first part sets out conceptions of professionalism at work, how professions work, and learning can be understood, and examines the kinds of institutional practices organized for developing occupational capacities. The second part focuses on procedural issues associated with learning for and through professional practice, and how assessment of professional capacities might progress. The key premise of this Handbook is that during both initial and ongoing professional development, individual learning processes are influenced and shaped through their professional environment and practices. Moreover, in turn, the practice and processes of learning through practice are shaped by their development, all of which are required to be understood through a range of research orientations, methods, and findings. This Handbook will appeal to academics working in fields of professional practice, including those who are concerned about developing these capacities in their students. In addition, students and research students will also find this Handbook a key reference resource to the field. *Trends in Education*, 1977 **Industrial Research Laboratories of the United States, Including Consulting Research Laboratories**, 1927 **Education at a Glance 2015 OECD Indicators**
