Melhem,2003 The objective of the research was to compare the performance of fiber reinforced and plain Portland Cement Concrete PCC overlay when used as a thin non dowelled overlay on top of a rubblized distressed concrete pavement The experiment was conducted at the Accelerated Testing Laboratory at Kansas State University and consisted of constructing

two pavements and subjecting them to full scale accelerated pavement test The pavements were constructed in the environmental pit so that heat cool temperature cycles were imposed The two pavements were subjected to 500 000 full truck axle passes Stresses and strains at several locations in the two pavements as well as the expansion contraction of the slabs were periodically recorded during the test The stress strain data as well as the location severity and extent of the cracking in the overlay clearly indicate that there is no benefit of including the plastic fibers in the concrete overlay The full scale accelerated test revealed that the thin non dowelled overlays are effective when used on top of distressed rubblized concrete pavements   **Expert MySQL** Charles Bell,2007-04-01 MySQL remains one of the hottest open source database technologies As the database has evolved into a product competitive with proprietary counterparts like Oracle and IBM DB2 MySQL has found favor with large scale corporate users who require high powered features and performance Expert MySQL is the first book to delve deep into the MySQL architecture showing users how to make the most of the database through creation of custom storage handlers optimization of MySQL s query execution and use of the embedded server product This book will interest users deploying MySQL in high traffic environments and in situations requiring minimal resource allocation   *Drug and Alcohol Testing Results 1996 Annual Report* Jean Ault,1997   **Library of Congress Subject Headings** Library of Congress,2010   **Subject-matter Index of Applications for Letters Patent, for the Year ...** Great Britain.
