Terrain Analysis John P. Wilson, John C. Gallant, 2000-08-03 The only reference on the use of GIS and related technologies in terrain analysis In this landmark publication reflecting the collaborative effort of thirteen research groups based in four countries leading experts detail how GIS and related technologies such as GPS and remote sensing are now being used with the aid of computer modeling in terrain analysis Continuing the innovative work of Professor Ian Moore a visionary who saw terrain analysis as a robust method for modeling the large areas and complex spatial patterns of environmental systems Terrain Analysis puts into action TAPES or Terrain Analysis Programs for Environmental Sciences Dr Moore s innovative tool for terrain analysis The book s contributors describe how TAPES are applied to specific geomorphologic problems explain the algorithms used in current terrain analysis software and examine the interpretation and use of terrain attributes in predictive models With expert coverage of terrain analysis in the digital age Terrain Analysis will be welcomed by ecologists environmental engineers geographers and hydrologists who increasingly depend on GIS GPS and remote sensing
